THE UNIVERSE IS AN ECOLOGICAL REPROCESSING SYSTEM OF RENEWAL

Every pulsar has a hole in the center. This hole also functions as heat sync by exhausting heat into the outer ergosphere. Everything must maintain a constant temperature including a pulsar which would incinerate and burn out if it was to overheat. A pulsar is using stars and planets to bathe itself in order to maintain a constant temperature and keep itself cool. The Palindrome 3•9•6; 6•9•3 Spirit Flux-fields are responsible for this heat dissipation vortex nozzle. If the pulsar's temperature fluctuated too high or too low it would immediately self destruct. Modern science is only now becoming aware that a macro scale quantum world exists on a gross scale. Even pulsars have a superfluid lattice that is macroscopically superconducting. This is life's process of renewal.

Compression/decompression, implosion/explosion, negative vortice/positive vortice, black hole/white hole, male/female are all the embodiment on the 3rd dimension of Spirit's emanating from the higher Omni-dimension. This cascade of Spirit is famously renowned by the ecstatic state of Nirvana which is the apex of consciousness.

A pulsar when observed by utilizing Vortex Based Mathematics is a torus coil in the form of a perfect crystal lattice structure. It stretches and gives without breaking and can never be ripped or torn. This indestructible torus hypersphere is eternal.

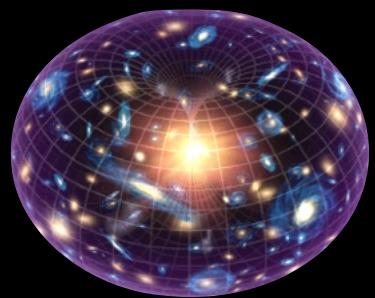

It was created by the breath of God. This inaudible sound can be heard everywhere in nature. Every life form is taping into God's invisible essence.

UNDERPINNING POWER OF THE UNIVERSE

This is an inexhaustible fuel which can be used for space power propulsion to go to the stars.

This invisible underpinning geometry of the universe is a holographic crystal lattice, Divine matrix, wire mesh grid in the form of God's tapestry and contains all of the axioms, principles, and laws governing the motion pathway of energy as it flows into the future. The brain and mind of man is governed by the same quantum rules which when

harnessed through meditation and mantra's by intonating the Most Great Name of God imparts Divine Guidance, Illumination, and Heavenly Assistance in this world and the next one too. The human brain is an antenna that transmits and receives communion with God and other holy souls.

THE VORTEX WELL IS A FUNNEL COMPOSED FROM MICRO UNDERPINNING NESTED VORTICES

If there is not a hole in the middle of a moving dynamic system it will shut down and cease to exist because of incineration from over heating. Heat dissipation is how the universe works. Everything maintains its existence by keeping a constant temperature that does not fluctuate beyond a small margin from the human body to a black hole in the center of our Milky Way galaxy. Only magnetism responds quick enough to Spirit to

give slippage and free play. Our bodies are made out of stardust from countless blackholes of the past. This is an ecological system of renewal that circulates based upon compression/decompression. This process is driven at the vertex which is the third component. The result is an optical illusion that resembles a duality when in reality it is a binary triplet. Even the yin and yang symbol has 3 parts.

NATURE REVEALS SPIRIT AMPLIFICATION

Prime numbers represent the Uniqueness and Oneness of God in the world of mathematics because they are odd, indivisible, and are a fine mist spray of spirit that creates all of the Family Number Groups.

The Rodin Coil is a winding pattern schematic for energy flowing into the future with no reluctance or parasitics cycling through time and space in accordance with biophysical harmonic principles.

The Secret of How to Ramp up and Increase the Output of a Rodin Coil

There are not endless higher dimensions above the 3rd dimension. All of the higher dimensions above the 3rd dimension are compacted, compressed, and folded together into one Omni-dimension.

In base 10 the 3.9.6 6.9.3 is an invisible, not seen, higher dimensional, Flux-field of one part Spirit and two parts magnetism. This is called the Equipotential Major Groove gap space. This gap space is always left alone and no copper wire conductor on the Rodin Coil is ever placed there.

This gap space is always empty and thereby allows the eddy currents of the underpinning nested vortices to activate. This gap space always exists in-between the super conducting 1-2-4-8-7-5 mobius circuits.

Divine Base 10 has one pair of Mobius Circuits and a single gap space.

Divine Base 26 has two pair of Mobius Circuits and a single gap space which now becomes longer but not wider.

Divine Base 50 has three pair of Mobius Circuits and a single gap space which is now even longer again but still not wider.

Divine Base 122 has four pair Mobius Circuits which once again only contain one gap space in-between them.

Only prime numbers squared base number counting systems create a hologram compacting all of the higher dimensions together into a perfect Omni-dimensional Hypersphere (torus).

If any number other than a prime is squared the result will be catastrophic. The result will be a tear in the torus skin and the great circles of the X, Y, Z axes will be broken.

Example:

The Radix 10 gap space is:

3.9.6; **6.9.3**; 3.9.6; **6.9.3**; 3.9.6; **6.9.3** ... ∞

Base ten has one pair of Mobius Circuits.

The Radix 26 gap space is:

5.10.25.15.20; **20.15.25.10.5**; 5.10.25.15.20;

20.15.25.10.5; 5.10.25.15.20;

20.15.25.10.5 ... ∞

Base twenty six has two pairs of Mobius Circuits.

The Radix 50 gap space is:

14. 7. 21. 49. 28. 42. 35; **35. 42. 28. 49. 21. 7.**

14; 14. 7. 21. 49. 28. 42. 35; **35. 42. 28. 49.**

21. 7. 14; 14. 7. 21. 49. 28. 42. 35; **35. 42. 28.**

49. 21. 7. 14 ... ∞

Base fifty has three pairs of Mobius Circuits.

The Radix 122 gap space is:

33, 22, 49, 11, 55, 121, 66, 110, 77, 99, 88; **88,**

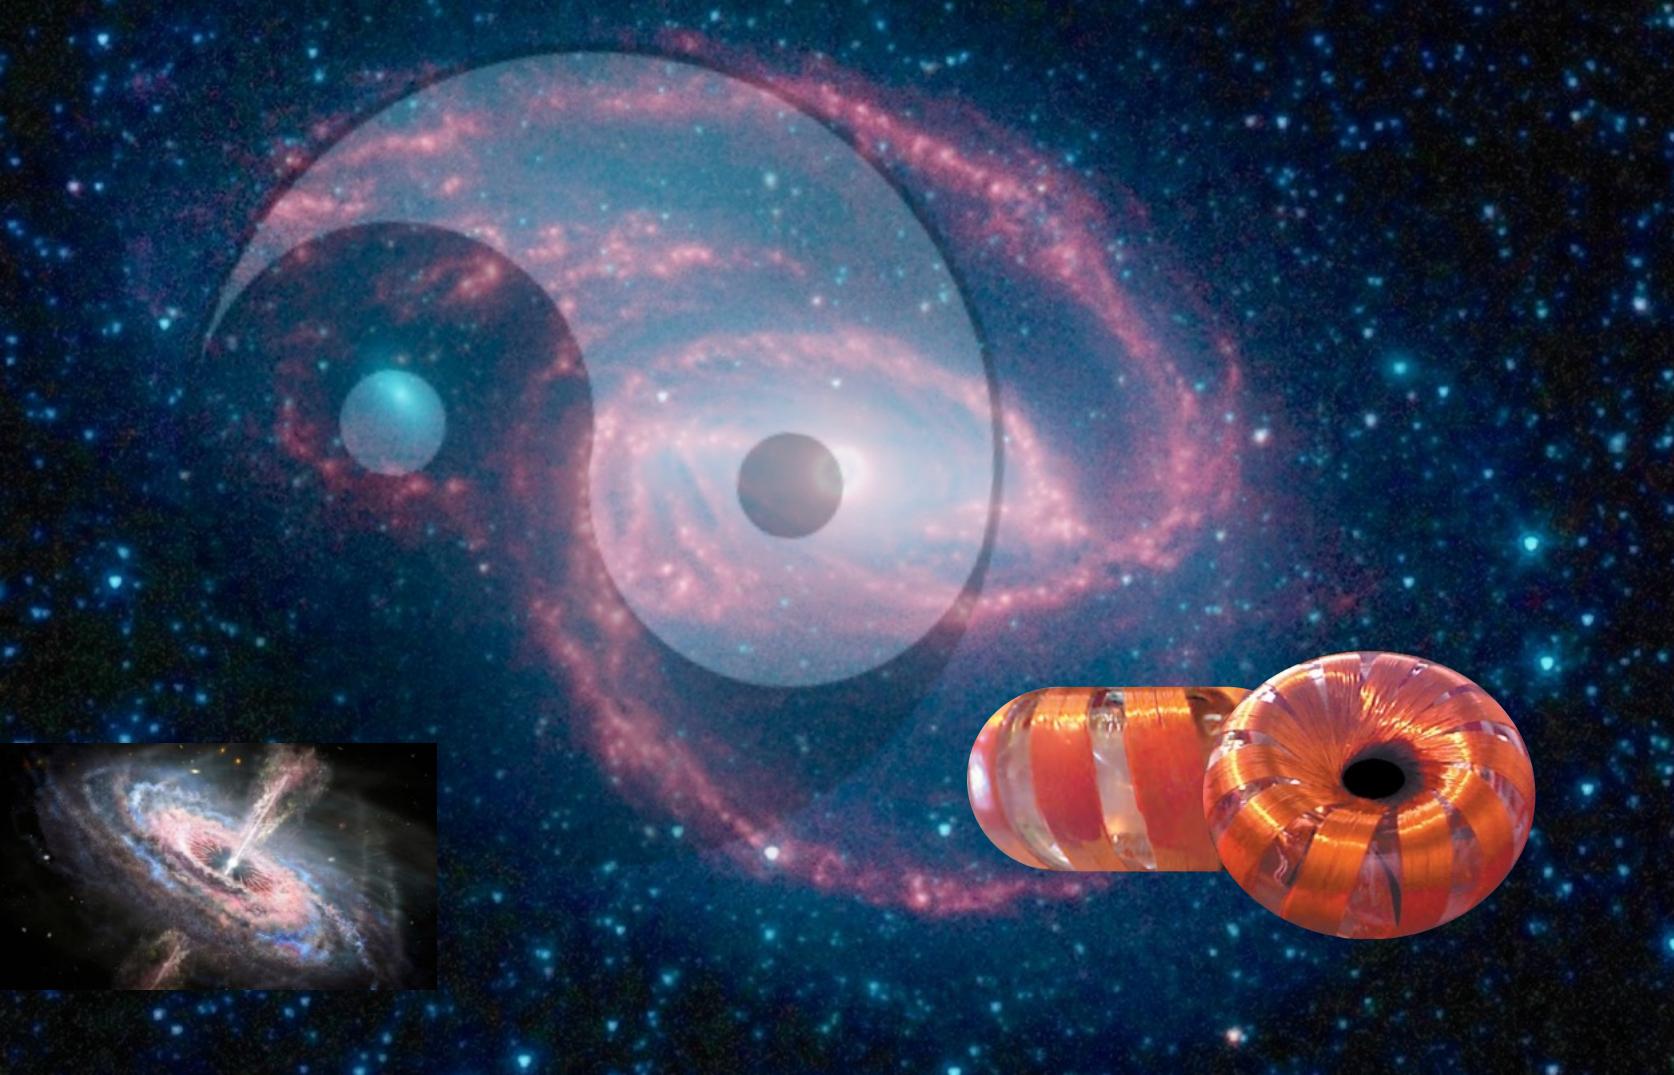

99, 77, 110, 66, 121, 55, 11, 49, 22, 33; 33,

22, 49, 11, 55, 121, 66, 110, 77, 99, 88; **88, 99,**

77, 110, 66, 121, 55, 11, 49, 22, 33 ...

Base one hundred twenty two has four pairs of Mobius Circuits. ∞

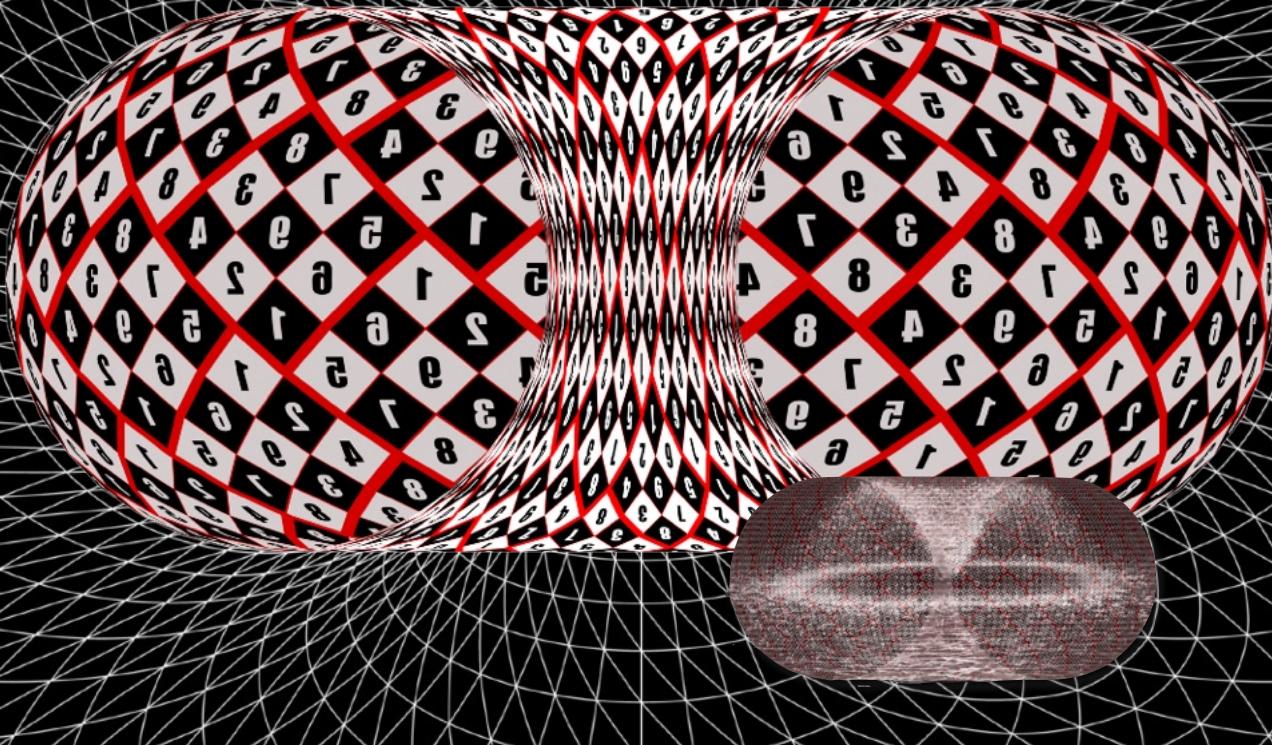

Only shown for brevity sake are four examples of Prime Numbers Squared toroid number maps. Professor Faren Thorp was the first to discover the relationship between Vortex Based Mathematics and prime numbers, and he was the first to understand that 2 was not a prime.

THE RODIN COIL HAS ZERO ENTROPY (DISORDER) NO RESISTANCE & NO FRICTION

The Decoqubit is the longest mean free pathway of least resistance. Through following the Mobius Circuits of the Decoqubit all resistance is eliminated. The Mobius Circuits provide superconductivity or, depending on the medium or material, superfluidity. Energy is self-insulating when it follows the Decoqubit geometric pathway. Marko has figured

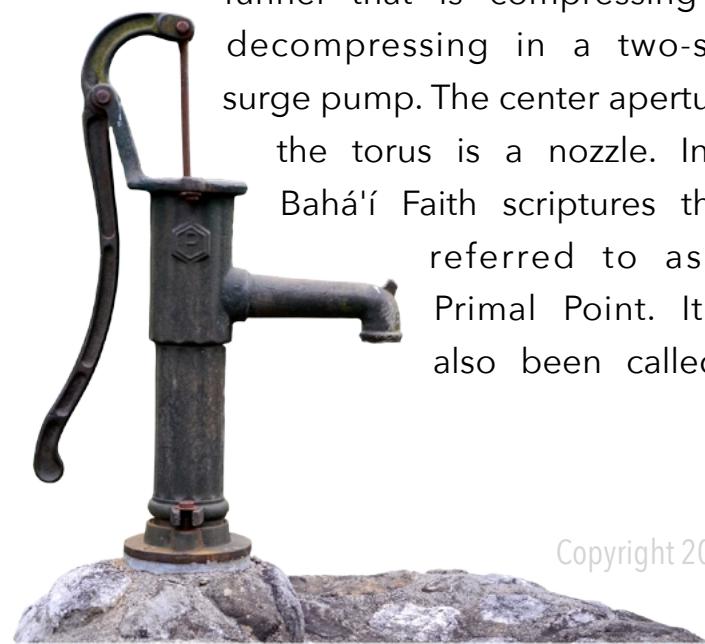

out how to get rid of hysteresis, parasitics and random collisions through uncovering the conduit and natural pathway of energy flow. Because every numbered Diamond Quantum Tile has an up, down, left, right, front and back, Marko is able to use this as a quantum supercomputer for information storage and retrieval.

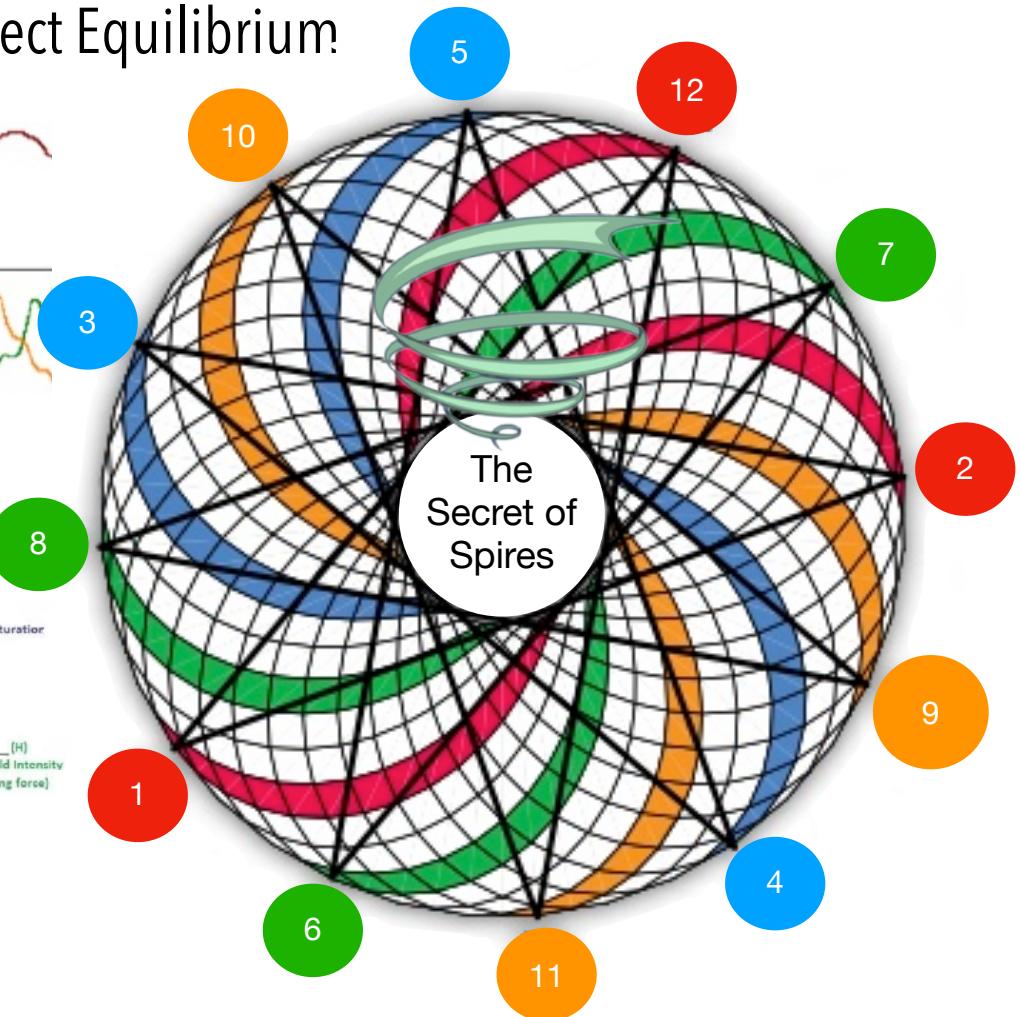

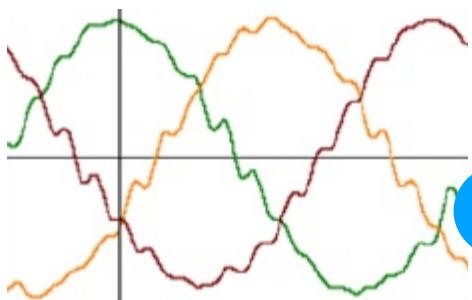

Every time you square a consecutive Prime Number
you increase the Möbius Circuit by two.

The torus at the top has a well. The well is crucial for good health. The well is a funnel that is compressing and decompressing in a two-stage surge pump. The center aperture of the torus is a nozzle. In the Bahá'í Faith scriptures this is referred to as the Primal Point. It has also been called the

Eye of God, Toroidal Pinch, Z-Pinch, saddle mirror symmetry coils ... etc. The Dandelion Puff Principle explains how Spirit is emanating from this constriction point. As Spirit shoots out it is traveling in a straight line from the inner diameter to the outer diameter in all directions. When Spirit pops through the torus skin it rarefies the surface topology and creates a counting number.

Spires Move in Perfect Equilibrium

Every time the Möbius Circuit winding passes itself it changes to another color.

BALANCING THE ELECTRICAL LOAD

In electrical distribution if the electricity is out of phase it will create resistance, parasitics, and hysteresis. There are different approaches to solving this problem such as Active Load Balancing. I have found a very simple solution to this problem. The Rodin Coil is an air core coil and has no iron core in the center. By following the 1-2-4-8-7-5 Möbius Circuit pathway the electrical load is perfectly balanced and evenly distributed between

the circuit pairs by utilizing Spirit's three phase shift event moment of activation. In this Rodin Coil winding map of one Möbius Circuit conductor there is a perfect Chinese finger puzzle where the harder you pull the more difficult it is to release. In this winding pattern the center of the conductor is always flanked on both sides by its furthest most opposite ends in perfect equilibrium. This eliminates all counter-electromotive force back EMF.

CONVENTIONAL WOUND COILS VS THE RODIN COIL

The problem made today by most people when designing a Rodin Coil is that they are confused by the optical illusion of the two circuits which have after making many revolutions around the coil only then do they finally lay side by side. They confuse together these two distinctly separate circuits. This circle of fifths, longest mean free pathway of least resistance is a much less acute angle than conventionally wound toroid coils. Conventional wound torrid coils create toroidal fields but the Rodin Coil generates a poloidal field that is aimed at the center of the coil like a pinwheel. It has been said by many others

that they have been able to get the Rodin Coil to self-resonate. The Rodin Coil has also been utilized as a capacitor and is capable of lighting LED's far below their rated value. It has been verified numerous times that the Rodin Coil is producing Over Unity free energy which is not coming from nowhere but instead is pouring out from the Omni-dimension and is called Spirit. It can run an entire home or even an industrial complex. Because the Rodin Coil is a nozzle it can be used for space power propulsion and makes mankind intergalactic citizens.

ONE CIRCUIT, SHOWING THE WINDINGS

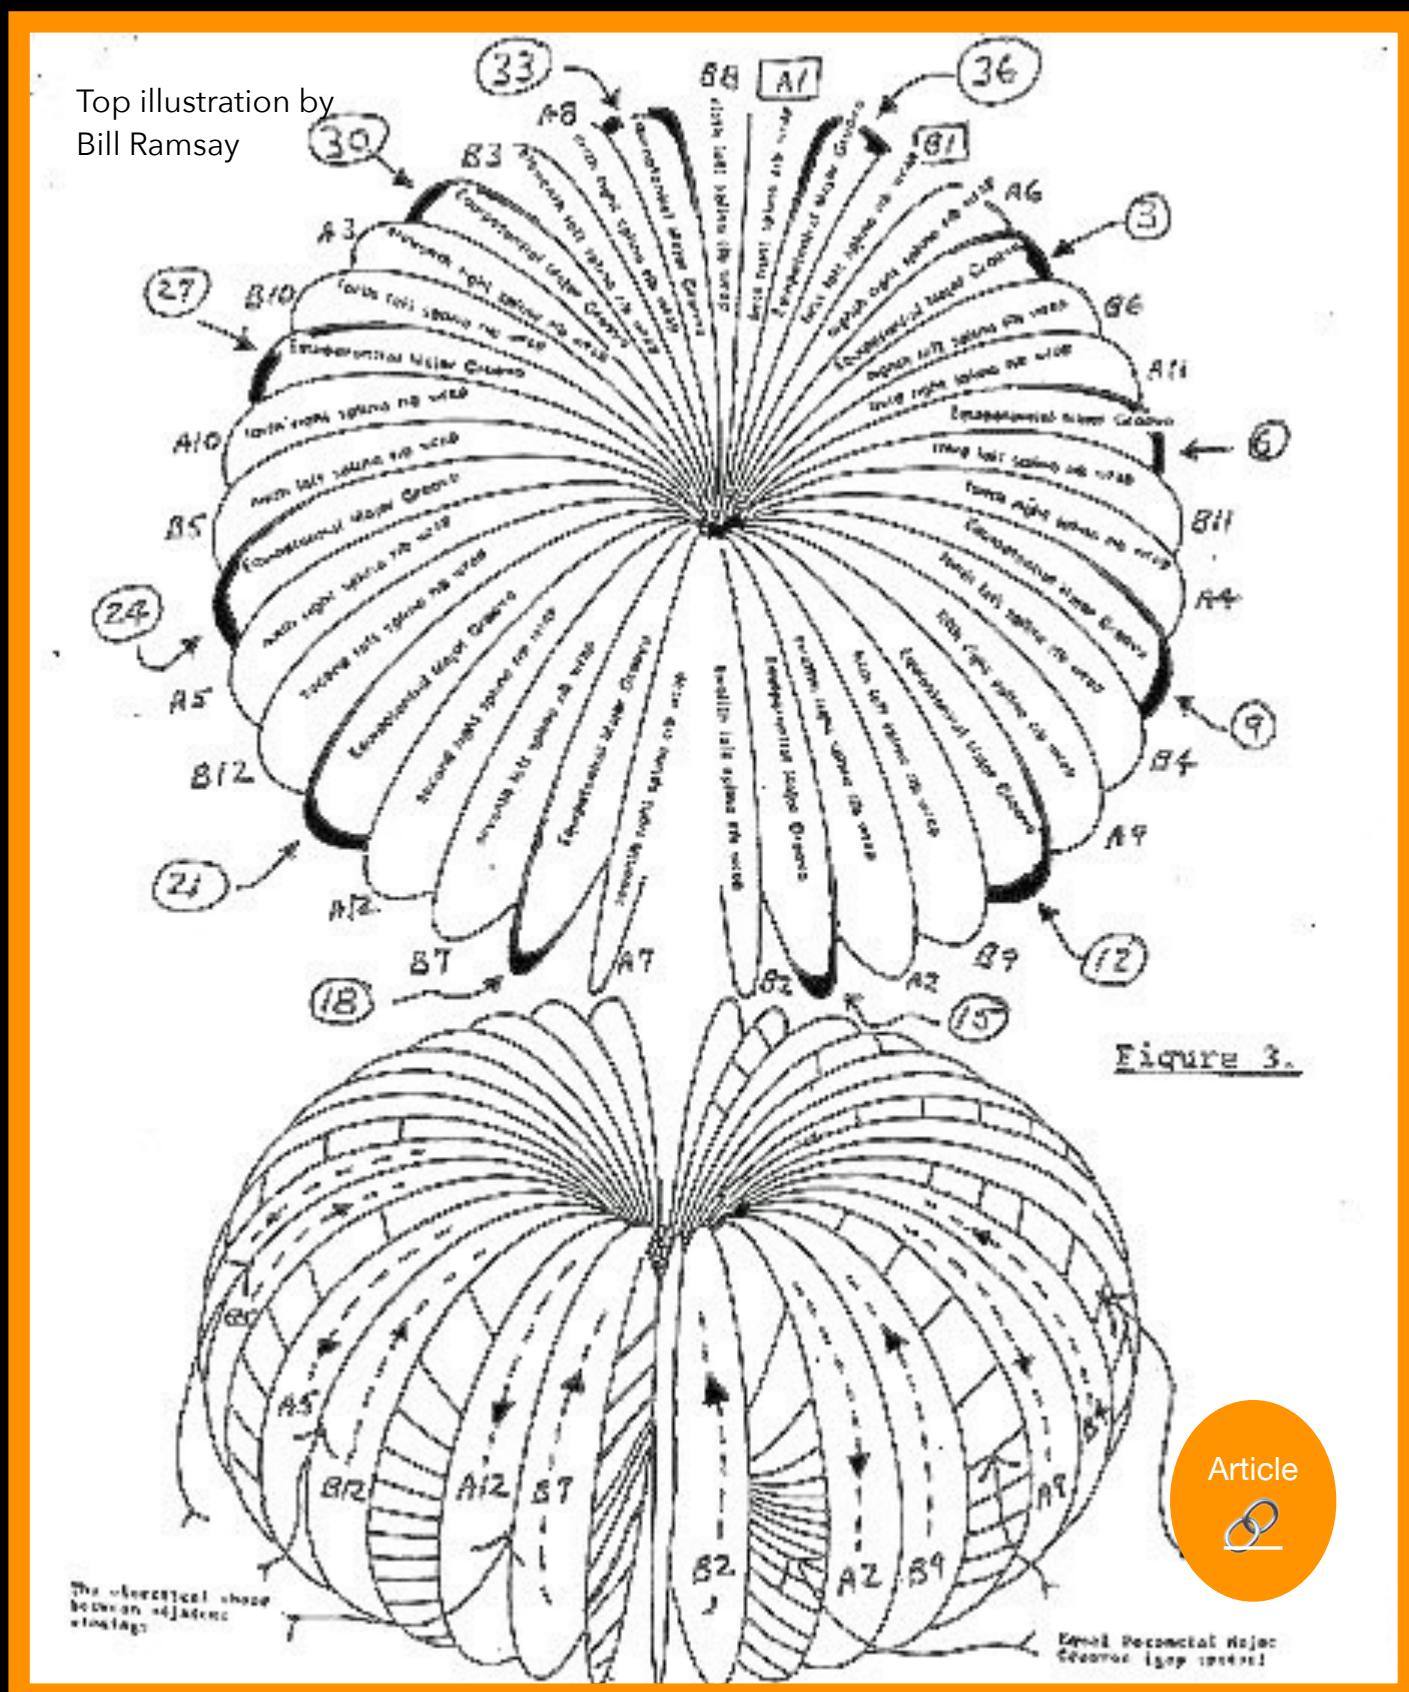

The Spires are a result of the windings, like different gears that connect they show the different pathways and its equilibrium, but it is only ONE mobius circuit. This hidden lattice emanates from the center creating our 3D reality.

This again is only one Möbius Circuit. Every time it threads through it creates a new spire which I have shown in the sequence order: red, blue, green, yellow, and then back to red again. And each angle moves like a Penrose triangle which folds in on itself.

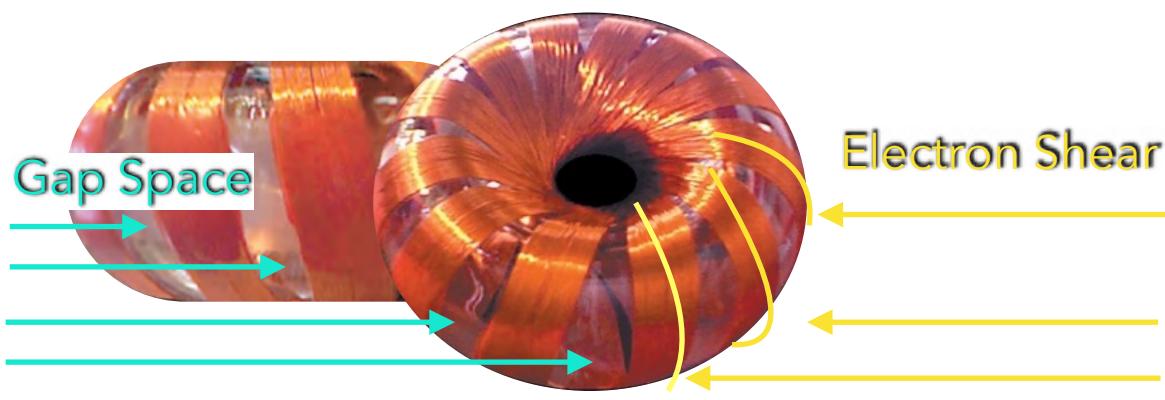

This quantum mechanics spin array creates perfect equilibrium movement, no pitch-yaw, no deviation, no friction. This is the a perfect over unity energy devise which works in harmony with nature's Divine Design.

While it is an optical illusion that it appears to be multiple gap spaces in the center of the Mobius Circuits and that there are numerous harmonic electron shears on the outskirts of the mobius circuits in reality there is only one.

Bottom illustration by Marko Rodin

How To Correctly Wind A Rodin Coil

There are many key component features that must be incorporated to create a Rodin Coil that superconducts with no resistance. These are:

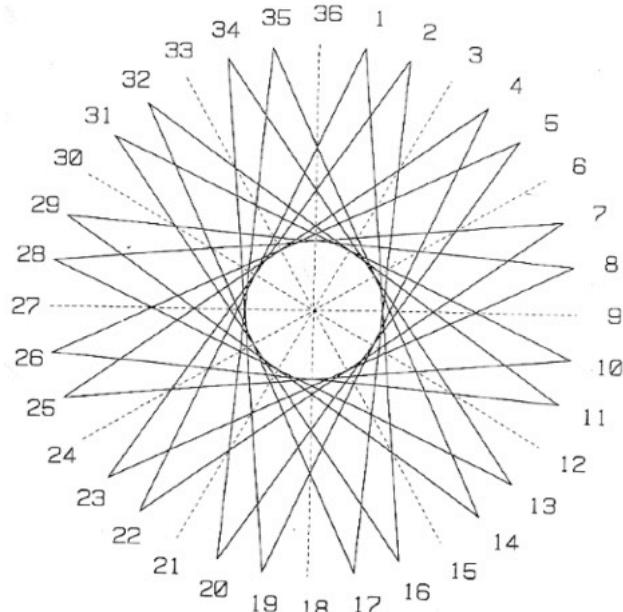

1. Closed loop Möbius Circuits that always comes in pairs with the current flowing in opposite directions. An input and output is unnecessary. I personally do not use stranded wire and prefer a plasma Rodin Coil with a changing aspect ratio. The Rodin Coil is a superconductor and can be made out of any continuous medium. Eventually, I believe that the Rodin Coil will be made on a molecular level using the atoms themselves in a quantum array.
2. The Equipotential Major Groove gap space which is always located in the center. This is where the higher dimensional Flux-fields underpinning nested vortices occur.
3. The harmonic Electron Shear is located at the outskirts of the Möbius Circuits as the result of being wound in spires. This creates a natural insulation along the world boundary condition. This is an invisible grain. Shellac or rubber coating insulation is unnecessary in a truly accurately designed Rodin Coil.
4. There are three Family Number Group phase change moments of event occurrences where only one conductor is energized alone, and then the second conductor is energized, then both conductors stay off while the higher-dimensional gap space turns on.

The Poloidal Rodin Coil

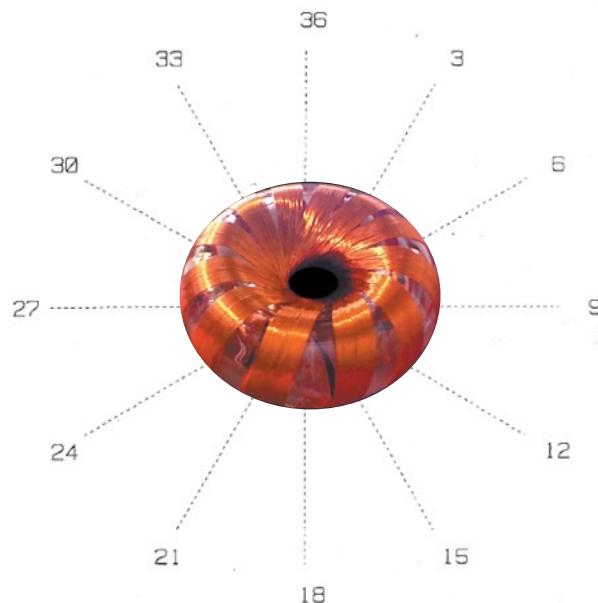

The Rodin Coil is not toroidal coil but a poloidal field generating coil.

Rodin Coil Toroid Simulation Magnetic Field

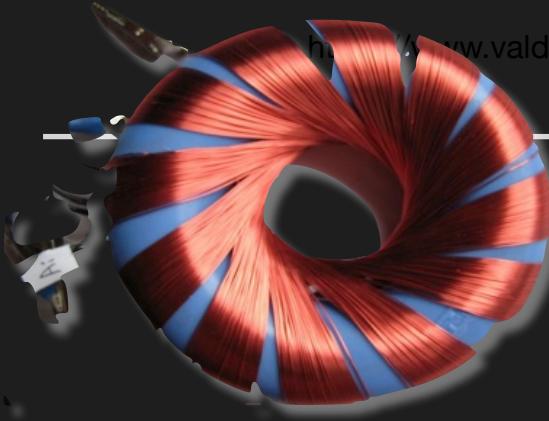

Magnetic field simulation of a Rodin Coil, Vortex based Mathematics with an Iron toroid inside.
I used Comsol Multiphysics for the simulation -
Cristian Tatu (Open Forum. 

The Rodin Coil does not require an iron core. There is also a twist or inverting at the core. Because the Rodin Coil is radically new technology it can not be easily simulated properly. These are wire mesh illustrations that do not accurately model the surface topology and changing aspect ratio of the mobius circuits.

<http://www.valdostamuseum.com/hamsmith/SegalConf.html#hopfibration>

🔗 Move it...

🔗 Healing Properties of the Rodin Coil

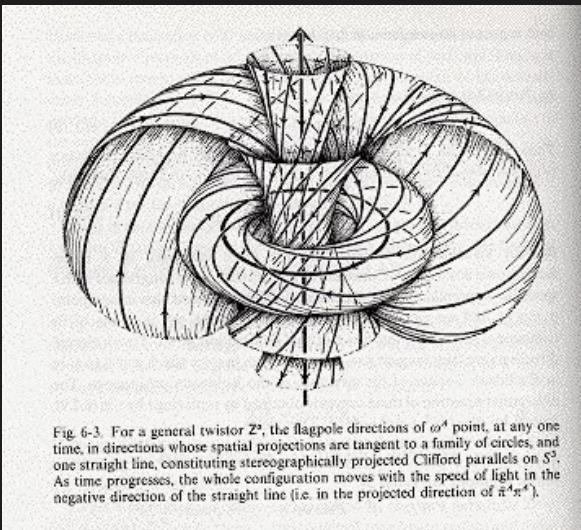

Fig. 6-3. For a general twistor Z^a , the flagpole directions of ω^a point, at any one time, in directions whose spatial projections are tangent to a family of circles, and one straight line, constituting stereographically projected Clifford parallels on S^2 . As time progresses, the whole configuration moves with the speed of light in the negative direction of the straight line (i.e. in the projected direction of $\dot{\pi}^a \pi^a$).

🔗 Hopf Fibration

None of these designs of these Rodin Coil are done to my specifications. Why? Because the back-bone of the Möbius Circuits need to abut so as to produce the Electron Harmonic Shear. The math is correct and the diagrams are correct. Everyone cuts corners because it is easier to use a single gauge wire which is wrong.
