

Entropy Does Not Exist in the Decoqubit Only Perfection Exists

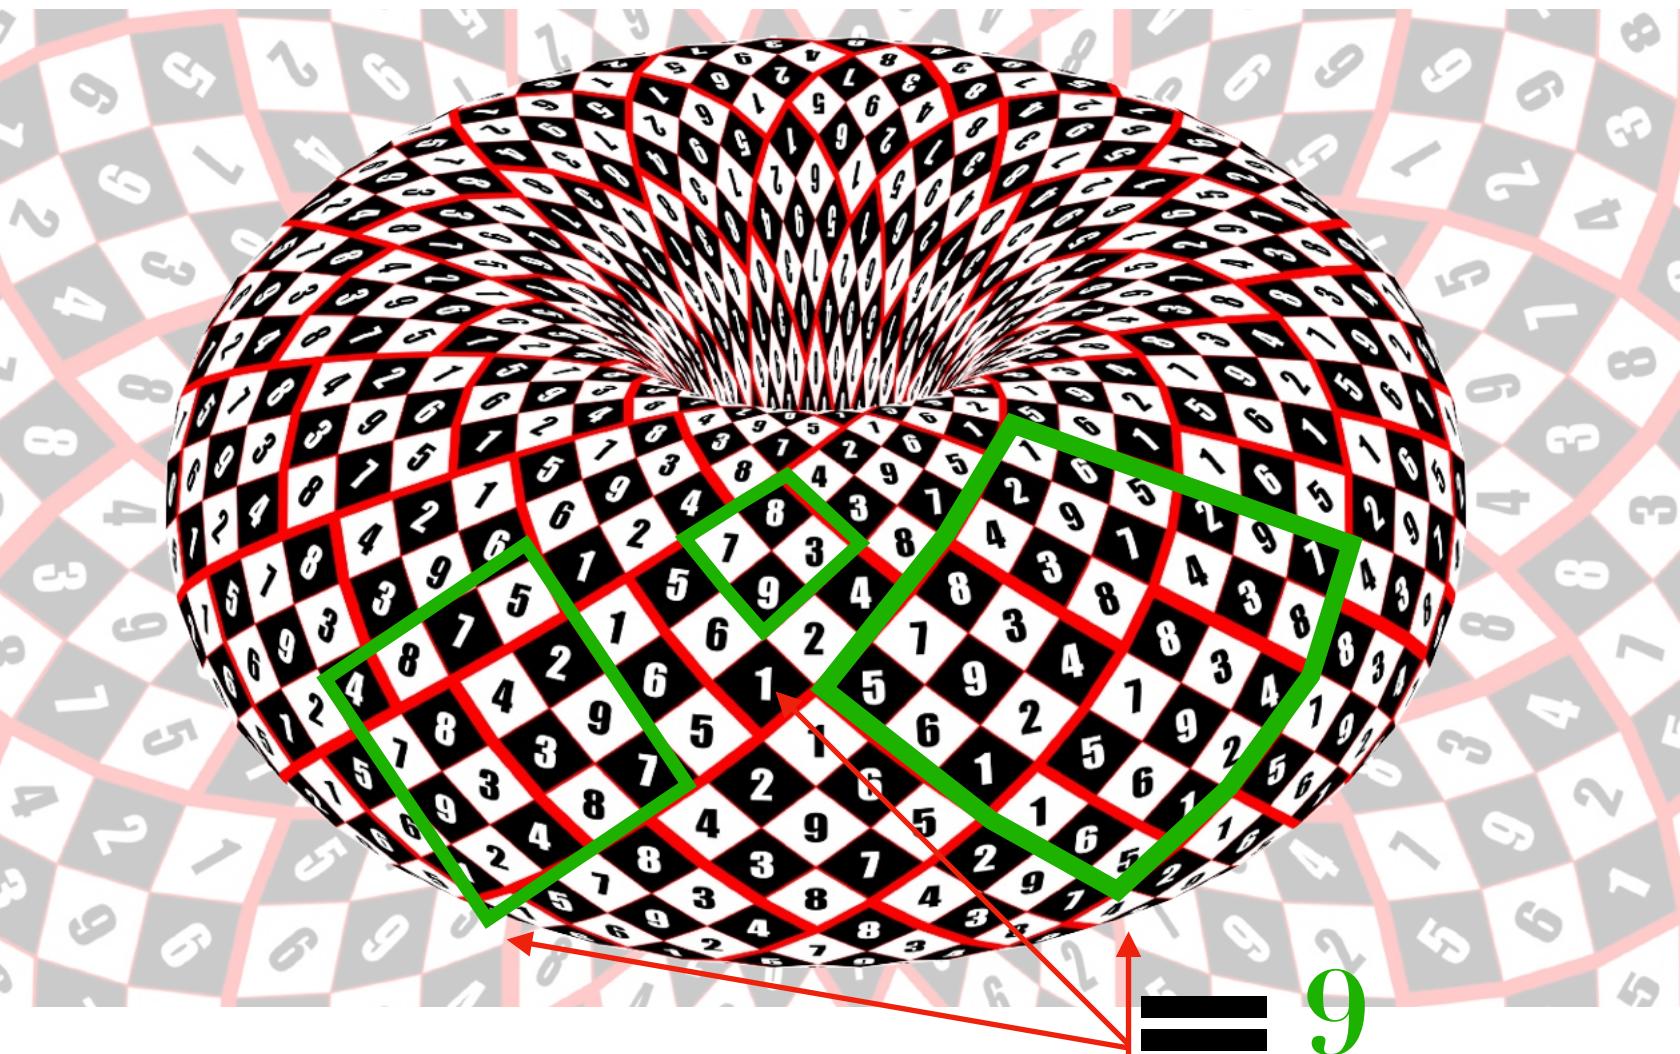

GROUPED TOGETHER EVEN NUMBER OF TILES

ALWAYS REDUCE TO THE NUMBER NINE

GROUPED TOGETHER ODD NUMBER OF TILES

ALWAYS REDUCE TO THE CENTER NUMBER

Even Numbers of Tiles Always Equal 9

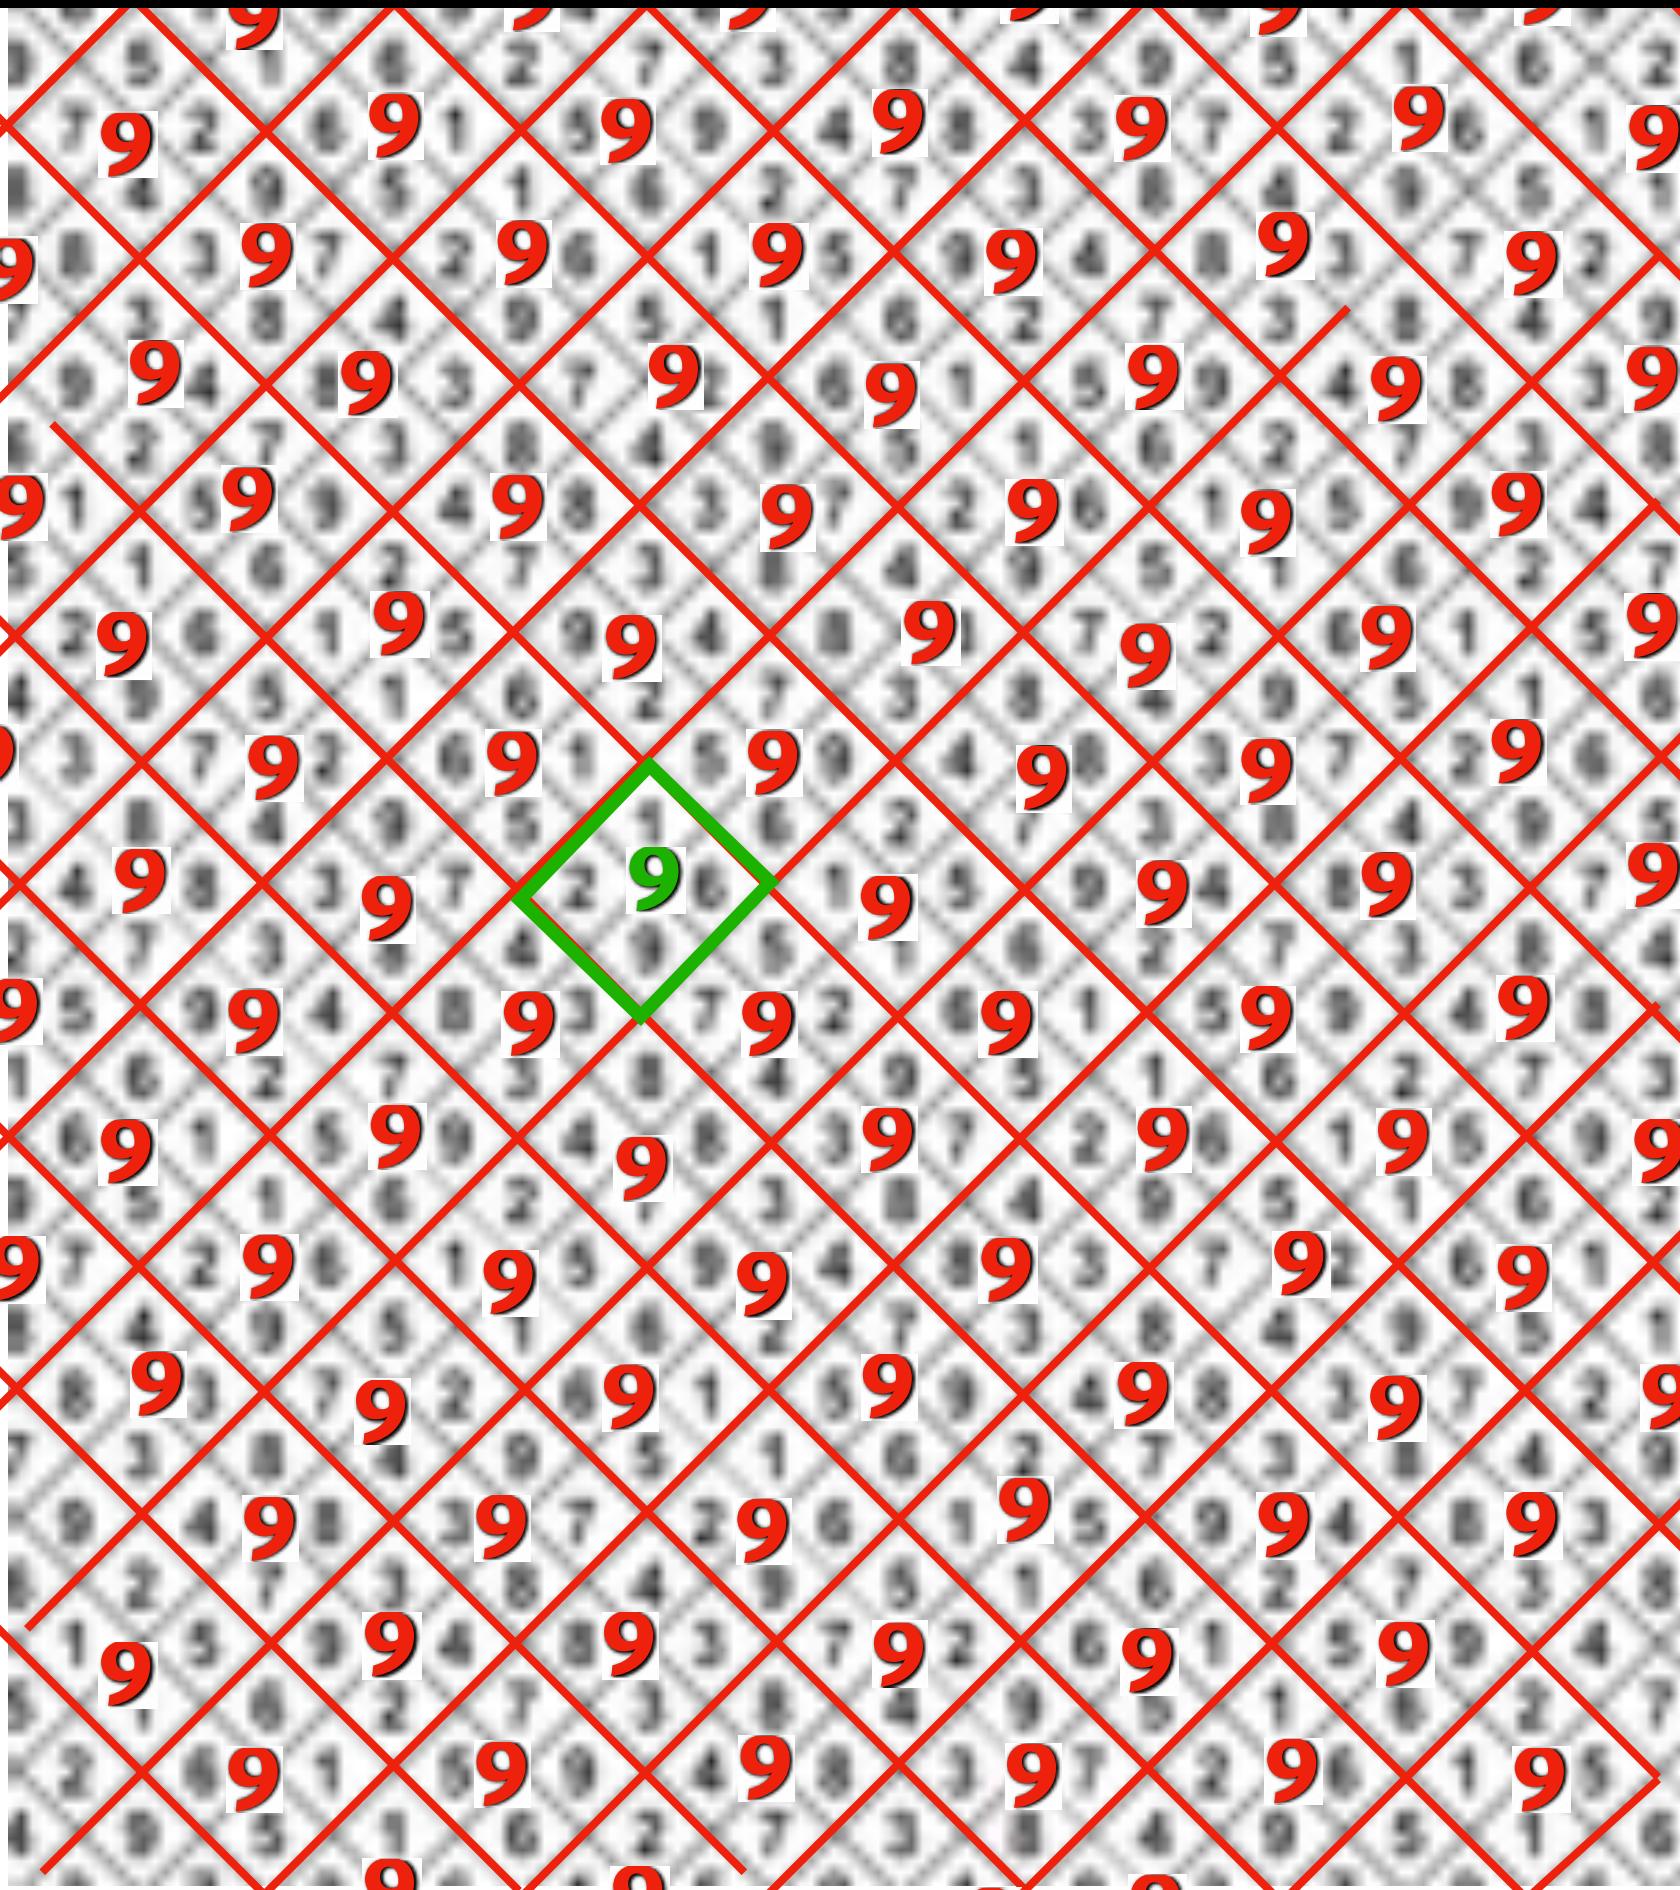

Numbers have a direct relationship to the inverse square law of physics. I have created a homeostasis of numbers. This is self-organizing chaos. No number is ever used more times than any other number. Perfection consists of no redundancy and no omission. If there was ever even one error in Vortex Based Mathematics the entire

discovery should be discarded. The Decoqubit Hypersphere reveals the transformation of potential energy into kinetic energy and is the realization of Unity. The hole is always in the middle and offsets everything by displacement.

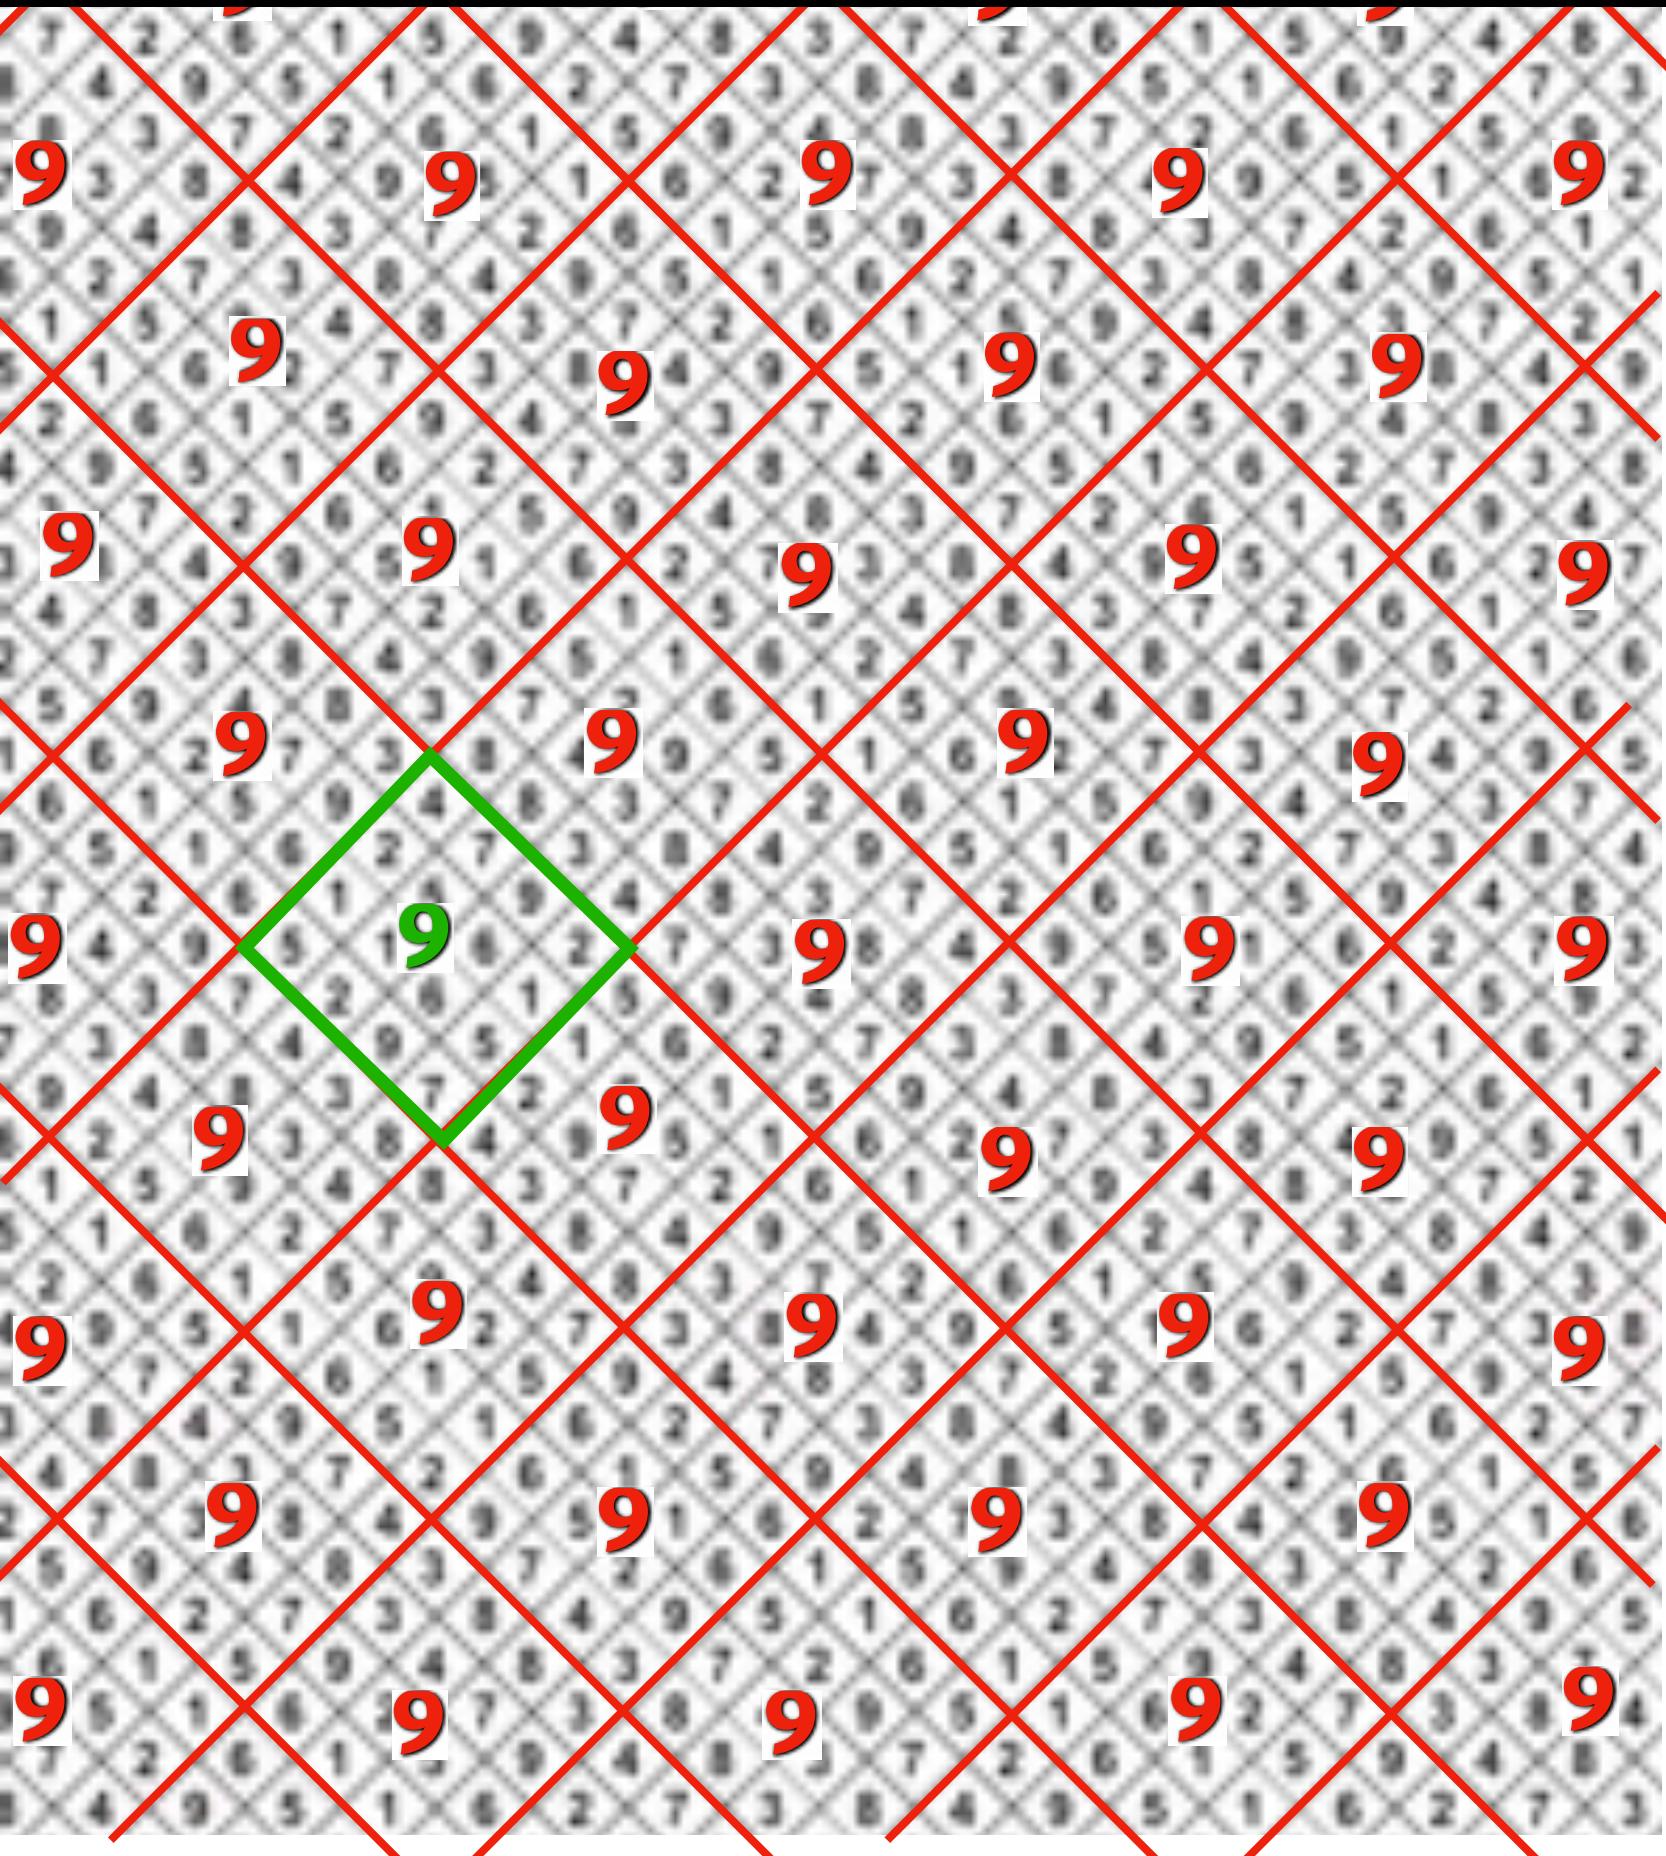

The Decoqubit Has No Decoherence

Even DQT Tiles 2 X 2 on a Radix-10

The Decoqubit Has No Decoherence

Even DQT Tiles 4 X 4 on a Radix-10

The Decoqubit Has No Decoherence

Even DQT Tiles 8 X 8 on a Radix-10
