

FIBONACCI 1, 1, 2, 3 ...

TESSERACT

ENNEAGRAM

PHI

PI

E

THE MANY FIBONACCI SEQUENCES ALL CONTAIN MOBIUS CIRCUITS SEPARATED BY THE FLUX FIELD GAP SPACE

The Fibonacci Series is just another Perspective of the Decoqubit Hypersphere

Embedded Inside the **Fibonacci Series** are Two Counter Rotating Mobius Circuits with the Equipotential Major Groove Gap Space located in the center.

There are always two counter-spiraling 1-2-4-8-7-5 Mobius Circuits in everything including the Fibonacci series.

The Equipotential Major Groove Gap Space* contains the Palindrome 3•9•6 6•9•3 higher dimensional Flux-fields which are the source.

**Equipotential Major Groove Gap Space is the distention that displaces the Mobius Circuits apart and keeps them separated.*

Fibonacci 1, 1, 2, 3 . . .

The Fibonacci sequence repeats after the 24th number and is arrayed around the circle in 15 degree increments.

3rd dimension is **green** and **blue**

Omni-4th dimension is **red**

The Fibonacci sequences contain one pair of Möbius Circuits based upon every fourth number and moves as noted by the blue and the green 1-2-4-8-7-5. This living matrix is multidimensional because of the 3•9•6 6•9•3 higher dimensional Flux-fields. All numbers taken their 180 degree opposite add or reduce to 9.

Fibonacci 1, 3, 4 . . .

Nothing exists that does not contain within it the Möbius Circuits and the 3•9•6 6•9•3 higher dimensional Flux-fields including the Fibonacci sequences. 3•9•6 are a completely different world, apart and above.

Fibonacci 1, 4, 5 . . .

The blue arrows are flowing counter clockwise and the green is flowing clockwise. Advanced applications are quantum algorithms from plotting the stock market to plotting of biological growth.

Because of perfect registration and calibration there are really 18 numbers hidden in Gods Primer. The other nine numbers are hidden from sight by being blocked from view. It looks like a binary system but it is based on a triplet.

THE TESSERACT IS OBSOLETED BY THE DECOQUBIT HYPERSPHERE TOROID NUMBER MAP

FOUR-DIMENSIONAL TESSERACT HYPERCUBE

THE DECOQUBIT AND THE TESSERACT ARE ONE IN THE SAME

A Secret Answer...

How do from the VW symbol to the Tesseract?

In Wikipedia when you look up the 4th dimension you get an illustration of a hypercube and Tesseract. These are very crude renderings of the 4th dimension.

The 3•9•6 with 9 being vertically aligned at the zenith above the zero, and the three and six being played apart, is the secret answer providing the missing information of the Omni-fourth dimensions location in relationship to the Möbius Circuit's position.

Nine is the control, three and six are the results. When nine is positive, three and six are both negative and when nine is negative, three and six are both positive.

This creates the Diamond Grain lattice structure necessary for superconductivity to occur.

The second law of thermodynamics restated differently is for every action there are two simultaneous half opposite equal reactions on the higher 5th/4th dimension. Cleaving in twain based upon positive emanation creates negative draft counter-space which accurately bestows polarity.

True polarity is based upon thirds and is not a duality. Prime numbers represent God by being odd because they are unique and peerless. God is the Single, the One.

THE 5 TH DIMENSION

THE PRIMAL POINT OF UNITY IS
THE SOURCE OF SPIRIT'S ORIGIN

The Monolith reveals a higher dimension by being vertically aligned with the W-axis located at the zenith. There is a reason why the number nine is always upright and at the top because it is a gateway between two different worlds. There is an energy flow between Heaven and earth.

The Tesseract is a Hypercube representing the next dimension above the 3-D dimension in conventional science (see link) but is only a gross man-made representation of the higher dimensions.

2-D projection of the Cube can be found in the Flower of Life

Time Component Correlation

Enneagram

Spirit is Reticulating Everything

The Enneagram, 1-2-4-8-7-5 Mobius Circuits, pyramid, torus, hypersphere, Antithesis Nexus Key and God's Spirit Primer are all different perspectives of how Spirit and magnetism occur together to create superfluidity (i.e. superconductivity).

Only magnetism responds quickly enough to give free play and slippage to Spirit which is always moving in the opposite direction. When 9 is positive, 3 and 6 are negative and when 9 is negative, 3 and 6 are both positive. 9 is the control and 3 and 6 are the simultaneous, instantaneous response.

4	2	1	5	7	8	4	2	1	5	7	8	4	2	1	5	7	8	4	2	1
2	9	6	6	9	3	3	9	6	6	9	3	3	9	6	6	9	3	3	9	2

Antithesis Nexus Key 7,9,2,5,6,1,1,6,5,2,9

Enneagram

The **Enneagram** is an ancient and sacred, geometric symbol (often associated with numbers), consisting of an Isosceles Triangles overlaid by a diagonal configuration of interlocking lines. The triangle in the Enneagram is equivalent to the 9-axis and the

oscillating 3-6 (see the Symbol of Enlightenment). The diagonal configuration of interlocking lines is equivalent precisely to the Doubling Circuits and the counter diagonal (antithesis Nexus Key) skin of the Abha Torus.

BOTH of these symbols are different views of the SAME thing looked at from different "points of view"? Or, that different points of view CAN represent EXACTLY the same thing?!

The classic Enneagram is composed from the repeating decimal number pattern of dividing by 7.

There is a palindromic number pattern counter diagonal to the Mobius Circuits upon the Decoqubit torus skin which is **1, 6, 5, 2, 9, 7, 4, 3, 8,** (see right page) from which the Enneagram is composed from.

It is a man made error to connect the 3 and 6 at the base of the pyramid. I always make the connection between the 3 and 9 and 6 and 9 a dotted line because **3.9.6** are a higher dimensional Flux-field composed from Spirit and magnetism.

The relationship of the Greater World to the lower world is revealed by the number 9 being a vertical straight line above the circuit intersection which is the convergence point where Karen placed a diamond to reveal its location.

The Divine Empyrean Heavenly World is orthogonal, perpendicular, tangential, and a right angle to our contingent, lower world.

The Decoqubit Toroid Number Map

The new Enneagram is also composed from numbers taken off of the skin of the Decoqubit Hypersphere.

Antithesis Nexus
Key Enneagram

1,6,5,2,9,7,4,3,8

We have highlighted the number pattern **1, 6, 5, 2, 9, 7, 4, 3, 8**, from the skin of the torus. We have then arrayed them around a circle. We then connect the 1-2-4-8-7-5 of the Mobius Circuits. The resulting geometric symbol is the classic Enneagram showing that the torus, Mobius Circuits, Antithesis Nexus Key and Enneagram are inextricably connected.

The Antithesis Nexus Key Enneagram is always counter diagonal to the Mobius Circuits and is composed from the Palindrome number pattern **1,6,5,2,9,7,4,3,8,8,3,4,7,9,2,5,6,1**.

This is the connection between the higher Omni-dimensional world of God and the lower three-dimensional world of matter.

The repeating number pattern of dividing by 7 follows the geometric pattern of the Mobius Circuits.

This is not a coincidence!

Dividing by 7 creates a repeating decimal that corresponds to a discrete whole number in a multiplication series.

Dividing by 7 creates multiples of 4:

Do not add together 142857.

Do not round up 142857.

$$142857 = 4$$

$$285714 = 8$$

$$428571 = 3$$

$$571428 = 7$$

$$714285 = 2$$

$$857142 = 6$$

Now you have the solution for converting 142857 to a whole number.

$$1 \div 7 = .142857 = 4$$

$$2 \div 7 = .285714 = 8$$

$$3 \div 7 = .428571 = 3$$

$$4 \div 7 = .571428 = 7$$

$$5 \div 7 = .714285 = 2$$

$$6 \div 7 = .857142 = 6$$

$$7 \div 7 = 1 = 1$$

$$8 \div 7 = 1.142857 = 5$$

$$9 \div 7 = 1.285714 = 9$$

Max Ronnersjö • CC BY-SA 3.0

Nature expresses itself
through numbers.

There are really 2 circuits that are represented in the Enneagram. The second circuit is hidden behind the first circuit. Because of perfect registration the second circuit is hidden from view and thus when you factor in positive and negative polarity there are really eighteen numbers and not nine. Because of information compression into the smallest achievable space all known functions and physical properties are contained within the Decoqubit including super conductivity, and the harmonic electron shear natural insulation.

The Polar mate:

8 is 1 = 9

7 is 2 = 9

5 is 4 = 9

They are mirrors
of each other.

PI is a Mathematical Misunderstanding

"Prime numbers are fundamental to the most common type of encryption used today in computer science. I have very simply decrypted the Most Great Name of God in the Bahá'i Faith."

- Marko Rodin

Pi is unquestionably the most popular mathematical enigma known to man.

Whats more everything in science is predicated upon it since it is a physical constant that everything is dependent on.

There are no endless repeating decimals and it is a man made error to round off or to approximate pi. Mankind by always taking pi out to a farther decimal place is nothing but folly.

Not only does mankind not see his error, but he perpetuates it by not realizing that an endless non-repeating decimal is God's own way of saying retract your steps because you have broken one of the utmost cardinal rules of math.

An endless non-repeating decimal is a red flag because mathematics is constructed so perfectly that it cannot be violated. All of the different varying branches of math such as arithmetic, sacred geometry, surface topology, calculus, etc. are consolidated into the Decoqubit Hypersphere.

I have pieced together all of the known functions, calculations, equations and formulas of the universe into one unified object which is the Decoqubit Hypersphere.

It is predicative, perfect, self-coherent, free from error, never redundant, elastic, scaleable from micro to macro, and contains no omissions. It is God's own coordinate system from which anyone can navigate throughout the universe.

The Decoqubit is a gyroscope with its own preferred frame of reference and spacial orientation. Momentum, potential, and kinetic energy are all revealed in the Decoqubit. Heat dissipation from the core of the Decoqubit into the outer ergosphere environment is its function.

The Decoqubit reveals past, present, and future simultaneously and obsoletes the Heisenberg uncertainty principle because discrete numbers are predictive and have their own physical attributes and qualities while not being invasive. Thus what is being observed remains unaffected.

SPIRIT RETICULATES EVERYTHING

The Decoqubit is the ultimate ideal from which everything else in the universe is patterned after. It is the Divine Standard and incomparable Touch Stone. Without it nothing would exist. All numbers are tethered to the core of the Decoqubit by Spirit. Mathematics is an artifact of Spirit. Everything is imprinted by Spirit and has Spirit's reticulation pattern on it.

ZERO IS NOT LOCATED ON A NUMBER LINE

There are only nine numbers in base ten because of the missing zero. This is why the mod is always one number less than the base. Base ten is zero through nine, not one to ten.

ZERO IS NOT A NUMBER

Zero does not exist in a multiplication series. A multiplication series does not begin with zero. Pi, Phi, and all of the other mathematical physical constants are wrong because zero displaces everything. Once it is properly understood when and where zero is located Pi and Phi are no longer endless repeating decimals.

ZERO IS IN THE CENTER

The Hole is in the Whole

A straight line cannot bisect a circle. There is always an incompressible hole in the middle. This hole offsets and displaces everything else. Zero does not begin a multiplication series nor does it begin a number line. On a circle 360° replaces zero. If you put a zero after 360° it would add another radiant degree thereby resulting in a miss-calculation. Zero is not a number. It is an absence. Base Ten does not consist of ten numbers but only nine. There exists only a handful of true fully dimensionalized base number counting systems which are all generated by prime numbers squared. The binary code, hexadecimal, based twelve, etc. are not at there full potential because they are not operating upon the Omni-dimension.
