## The Reality of Perfection, Revealing the Divine Code

Vortex Based Mathematics (VBM) is a new and different type of mathematics and as Blake, director for Microsoft's Advanced Future Operating Systems, has already said has never existed before in academia and has been overlooked by all conventional science. Blake has been very clear in stating he believes it will transform all technology and science. It is well-known that a

civilization cannot evolve any further than their level of mathematics. The name is Vortex Based Mathematics because it is based upon whether the underpinning nested vortices are staggered or aligned, which determines the function of the molecule and would create the ultimate quantum computer and obsolete all existing quantum computers.

# Marko Rodin Explains Vortex Based Mathematics

## A Game Changing Technology

Marko Rodin discovered a series of regularities in the decimal number system heretofore undocumented and overlooked by conventional mathematics and science. These patterns layout on the surface and within the volume of a torus, giving way to a revolutionary body of work known as Vortex Based Mathematics.

## The Decoqubit is a Holographic Hypersphere

Marko Rodin's Decoqubit is a Divine algorithm that is the schematic of the universe. It reveals the pathway that all matter and energy takes as it flows into the future, from the quantum level up to solar systems and galaxies. Simply stated, Marko has discovered the underpinning geometry of the universe and the source of the non-decaying spin of the electron.

## Transformative Implications

The scope of Rodin's discoveries is staggering and universally applicable to some of the most coveted areas of scientific research & development, including Zero-Point Energy, Advanced Propulsion Systems, Quantum Computing, Artificial Intelligence, and DNA Science.

*O My Well-Beloved! Thou hast breathed Thy Breath into Me, and divorced Me from Mine own Self. Thou didst, subsequently, decree that no more than a faint reflection, a mere emblem of Thy Reality within Me be left among the perverse and envious. Behold, how, deluded by this emblem, they have risen against Me, and heaped upon Me their denials! Uncover Thy Self, therefore, O My Best-Beloved, and deliver Me from My plight.*

*Thereupon a Voice replied: "I love, I*

*dearly cherish this emblem. How can I consent that Mine eyes, alone, gaze upon this emblem, and that no heart except Mine heart recognize it? By My Beauty, which is the same as Thy Beauty! My wish is to hide Thee from Mine own eyes: how much more from the eyes of men!"*

## Attributes of God

These attributes of God are not, and have never been, vouchsafed specially unto certain Prophets, and withheld from others. Nay, all the Prophets of God, His well-favored, His holy and chosen Messengers are, without exception, the bearers of His names, and the embodiments of His

attributes. They only differ in the intensity of their revelation, and the comparative potency of their light. Even as He hath revealed: "Some of the Apostles We have caused to excel the others.

— Bahá'u'lláh

## Divine Guidance

The purpose of life is to receive Divine guidance and inspiration. The human brain is an antenna that communes with God. By the number Nine being in vertical alignment in the Abhá Cypher above the hole there is a door that opens up. The 5th dimension and all of the higher multi-

dimensions are all contained and compressed together in the Omni-dimension which is represented by distance and spacial area. The vertical alignment reveals the Apex of Consciousness. This is the highest station of Life in God.

# Triune Gateway Between Worlds

## Enter the Japanese Torii or the India's Torana

Gateways to transformation from the mundane to the sacred.

We are all worshiping from different perspectives the exact same thing.

Religion, mysticism, metaphysics, and all of the prophets, messengers, and manifestations of God all knew and were always aware of this divine

principle of creation which applies spiritually as well as materially to both astrophysics and the human temple.

# The Native American Dream Catcher is the Living Hologram

Based on physics we're living in a system of cycles within a wheel of deterministic, fractal repeating patterns. Deterministic means the longest mean free pathway of least resistance... meaning no random collisions, no friction. It is determined by spirit that when we are out of alignment it is harder to harness true potential. By getting into proper angular alinement we are tapping into the momentum of Spirit, the

source of all motion. Through Biophysical Harmonics you can tap into the Most Great Name of God. By knowing the precise mystic intonation you are literally harnessing Spirit. The Mystic Word of God is the source of Spirit. It is the Alif which is the seat of the Hamza. In English this is the diacritical symbol for the Glottal Stop and is the breath of Life.

# SONOPHYSICS CAVITATION

## THE PRIMAL POINT OF UNITY IS PULSING

### OSCILLATING FROM PRIMAL SOURCE

IMPLODING CAVITY in a liquid irradiated with ultrasound is captured in a high-speed flash photomicrograph (above). The implosion heats the gases inside the cavity to 5,500 degrees Celsius. Since this cavity formed near a solid surface, the implosion is asymmetric,

expelling a jet of liquid at roughly 400 kilometers per hour, both the heat and the jet contribute to a unique chemical environment in the liquid. The diameter of the cavity is about 150 microns. The drawing (left) shows the stages of cavity implosion and the formation of the jet. The cavity is spherical at first and then shrinks rapidly. The jet develops opposite the solid surface and moves towards it.

# In the Beginning....

At the epicenter of the universe exists a humungous black hole that is imploding. On the other side of this black hole is a white hole that is expanding.

The male black hole is a negative vortex, compressing implosion. The female white hole is a positive vortex which is leaving the Zero, Primal Point, Singularity hole and bringing out the hot jet fusion stream of nebular gaseous matter which when cooled off will create all life forms, from atoms to galaxies.

The black hole at the top is pulling inwards in conjunction with the white whole, at the bottom, just like an hourglass, transmitting outwards in a steady state, one way, positive stream flow, closed-loop, two cycle surge pump, which is an ecological purification system of renewal.

# WEAVING SPACE

OUR BODIES ARE MADE OUT OF COUNTLESS STARS OF THE PAST

All multiplication series are cross-sections of a twisting hypersphere that inverts in the center at the tore. Our human torso is named after the torus and the tore. The word tore means there is a hole in the center. The field is a result of Spirit's emanations. Nine replaces zero on the circumference of a circle and is always located at the top. Every multiplication series begins at nine and not zero. Zero never exists on a number line and never begins a multiplication series because a number cannot be created or destroyed just as in matter turns into energy and energy is turned into matter.

Weaving the 3D Evolution of the Torus

# THE 3D EVOLUTION OF THE TORUS

## FROM THE 2D STANDARD MULTIPLICATION TABLE

Every multiplication series in existence is transpiring simultaneously within the holographic Decoqubit torus thereby expressing unity and revealing perfection.

The 8 – 9 – 1 ... multiplication series for the vertically traveling down positive "X" axis sliding scale coordinate system.

The 4 – 9 – 5 ... multiplication series for five for the horizontal traveling to the right positive "Y" axis sliding scale coordinate system.

Every multiplication series of the utmost attainable possibility is transpiring simultaneously together as one whole contained within the inestimable Decoqubit toroid map.

9	9	9	9	9	9	9	9	9

There are only two polar quadrants which are fully inverted to produce a reflection image.

+	-
-	+

The Standard Multiplication Table is comprised of squares which is inaccurate. A square consists of vertical and horizontal lines. There are no vertical and horizontal lines in 3D space. When using a quad ruled piece of graph paper it needs to be rotated 90 degrees thereby turning the squares into diamonds. Literally, diamonds give double the data plus negative and positive polarity. Squares are wrong. Diamonds are right. Diamonds are elastic

and flexible. Squares are brittle and easily torn. Diamonds are an accordion because they expand and contract. Squares when pulled on the weft or warp rip and tear. The curvature of space-time reality uses diamonds and not squares. When scientists model a black hole with vertical and horizontal lines they are wrong. The torus is three dimensional because it is made out of diamonds and not squares.

## FLOWER OF LIFE

By using Vortex Based Mathematics Randy Powell was able to numerically map the Flower of Life.

## TORUS OF STARS

"With this discovery I was able to see that not only is the Flower of Life is a layered 3D higher dimensional map but that it is animated by interlocking gears. These gears reveal counter-rotating wheels within wheels that open up the secret not only of phi and the fibonacci sequence but of all platonic solids and beyond".

– Randy Powell

Marko Rodin's theory is that the relationships between numbers are real relationships which exist throughout nature, and he discovered a remarkable pattern of relationships in the numbers 0 - 9. The beginning of the pattern is that these numbers exist in bipolar pairs. We begin at the outside: 0 is in a pair with 9. Now, 0 isn't really a number, it's a place holder, a point of origin. Which means that 9 has no real polar opposite; it stands alone.

# THE UNIVERSAL FORMULA FOR INDESTRUCTIBLE NUMBERS

The Abhá Cypher completely explains all the fundamental principles of the universe. The beginning and end and origin are one and the same; and are located at the Primal Point of Unity; and is in the Most Great Name of God.

## 9 IS OMNIPRESENT SPIRIT FIRE

And is always vertically aligned with the Zero

Green is the Mobius Circuit veins of existence, the lattice, the matrix pathway that energy takes as it flows into the future.

# The Hole is in the Whole

The elusive W-Axis is revealed when the number Nine is in alignment above the zero at the intersection of the Primal Point of Unity which is located at the center of the Mobius Circuit. It is the source of time and the ephemeral light rays of Spirit. This is where all of the higher dimensions are compressed together into One place called the Equipotential Major Groove Gap Space. All of the higher dimensions, regardless of how many is irrelevant because they are all consolidated into the Omni-dimension which is 3 . 9 . 6; 6 . 9 . 3; 3 . 9 . 6.

## PRIME NUMBERS SQUARED: THE CREATION EQUATION

### Nine is Spirit's Fire

The apex number nine is Spirit's Fire revealed by the Crown Chakra being vertically aligned above the zero's hole. Spirit is invisible as it travels tangentially (shown by the upright, dotted, red line arrow on the left side page) while moving in a straight line from the inner diameter (I.D.) to the outer diameter (O.D.) of the Torus. Spirit/magnetism is Orthogonal and intersects electricity at a right angle thereby imparting motion and spin. This brings into existence the three different Family Number Groups. These three, phase shift, time event moment of occurrences, together, make up the base ten numerical counting system of Vortex Based Mathematics (VBM). Only spirit can travel in a straight line Omni-dimensionally.

### Mobius Circuit

Where the Mobius Circuit overlaps along the central axis there is a hole that never closes and is the Aperture.

### Zero

Zero is a funnel. Without this hole there would be no heat dissipation and the entire universe would incinerate by burning up. Instead this thermal refrigeration system is regulating itself at a constant temperature by transmitting waste heat into the outer ergosphere environment. This is a closed looped cycle of renewal.

# QUANTUM SUPERPOSITION AND THE THREE DIFFERENT FAMILY NUMBER GROUPS

The Decoqubit is comprised from three different Family Number Groups. Each family number group is made from the other two Family Number Groups. This is a very elaborate structure that scales from the micro to the macro. Large scale quantum macroscopic results are obtainable by utilizing Vortex Based Mathematics which brings positive and negative polarity dynamics into play. VBM's diamond tile living matrix facets enables you to know where the electron moment is, where the electron came from, and where the electron is going, past, present, and future non invasively thereby obsoleting the Heinsberg Uncertainty Principle. Vortex Based Mathematics is the choreography and dance of Family Number Groups within the Underpinning Nested Vortices.

Tesla's 3, 6, 9 when quantized is palindrome

$$+3 -\textcolor{red}{9} +6; -6 +\textcolor{red}{9} -3; +3 -\textcolor{red}{9} +6$$

There are three Family Number Groups in the VBM base ten number counting system. These correspond to the three phase shift changes that Spirit/magnetism takes when it creates discrete numbers over the torus skin.

The number 9, Spirit Fire, is always in between 3 and 6, and emanating invisibly from the inside-out along the W-Axis. Numbers 3 and 6 never touch. Fifty percent of the torus are negative tiles and fifty percent are positive tiles. The Mobius Circuits transforms the binary code into a three dimensional quantum computer based upon triangulation where infinity becomes recursive as it moves diagonally along the quantum diamond tile facets.

# The Superfluid Möbius Circuits

The preferred longest mean free pathway of least resistance for electrical superconductivity always follows the 1-2-4-8-7-5 bounded infinity Möbius Circuits. The 3•9•6 imparts triangulation on the quantum macroscopic level to the 1-2-4-8-7-5.

The Abhá Cypher Primer

Diamond Grain Crystal Lattice Structure

Discrete numbers reveal a masterplan,  
proving that we are not alone.

The Most Great Name of God (MGN) is Bahá' and all of its 360 derivatives with the highest superlative case being 'Abhá. The 'Abhá kingdom is the invisible, Divine, Heavenly world. 'Abhá translates into several meanings including Splendor, Wondrous, and Luminous. Bahá' means Glory, Light, and Value. It is through the agency of the MGN that creation was brought into being and is constantly renewed. The diamond and the number 9 are all generated from the MGN.  $3^2 = 9$  Three is the first true prime number. Two is NOT a prime.

# Power of 9

## THE TOROID NUMBER MAP EQUALS THE DECOQUBIT COMPOSED FROM PAIRS OF MOBIUS CIRCUITS

Nine is the exact opposite of energy cancellation. Nine is energy amplification. The second law of thermal dynamics is wrong. Since nine is always an invisible W-Axis it has incorrectly been believed to not exist.

1x9=9  
2x9=18, 1+8=9  
3x9=27, 2+7=9  
4x9=36, 3+6=9  
5x9=45, 4+5=9  
6x9=54, 5+4=9  
7x9=63, 6+3=9  
8x9=72, 7+2=9  
9x9=81, 8+1=9  
10x9=90, 9+0=9

Each number has its own attribute and quality that makes it unique. Zero is not a number. It is an absence and a hole. Nine is always located at the Zenith above the zero. The pathway of Spirit emanating is from the zero to the 9 along the W-Axis which is a straight, vertical, upright line.

## Heaven and Earth and Creation

Verily, We have caused the signs to descend after nine conditions, each of which is a proof of the Dominion of God, the Protector, the Self-existent, any one of these conditions is sufficient to convince whomsoever is in heaven and earth, but the majority of people are heedless.

Jack London describes waves of water as "communicated agitation's" in which the water itself does not change position. The same description applies to mathematical equations. The numbers do not move, but our calculations flow over them. In this way, using the 9 conditions after which the universe is created, we can model all spatial orientations and preferred frames of reference.

The three dimensions are defined by the effects of Spirit on matter, and can be mapped by winding the doubling Möbius Circuit through a circle. The result is a Decoqubit toroid.

## THE MOST PREDICTIVE FEEDBACK LOOP

The Decoqubit is the ultimate ideal, perfect hypercomputer that has encoded within it innately all of the knowledge of the universe.

Modern day computers are useless in modeling quantum data since they are functioning without the  $+3 -\textcolor{red}{9} +6; -6 +\textcolor{red}{9} -3; +3 -\textcolor{red}{9} +6$  higher dimensional source for the binary code.

Though God seems to be invisible in this Hologram, He is apparent and manifested everywhere and in everything via His Divine light which has created a holographic Universe.

While nine is not seen, its influence, and affects are always felt. The number nine is the vertical upright axis and is the Omni-dimensional pathway that Spirit always takes.

Harnessing Spirit by tapping into the number nine directly taps into the core and allows all of the torus tiles to be mirrors reflecting God's light from the center. Not only are all DQT tiles in equilibrium but also all the known mathematical functions and calculations are spin arrayed too in perfect harmony.

# THE DECOQUBIT HYPERCOMPUTER

These triangle, hexagon, diamond, schematics are blueprints for a tensor array quantum hypercomputer that is endless times magnitude faster than a supercomputer. This is the full use and application of Vortex Based Mathematics principles and axioms combined. Not only is this knowledge applied to the hardware but also is the design of the quantum algorithms.

Even in the triangles, hexagons, diamonds, and rectangles the polar number mates are always seen in action with their opposite polarities.

Three and six can never touch and only connect with the number nine. They are the furthest most distance from one another and create the forwards motion of time. Nine is Omni-dimensional Spirit and 3 and 6 are the magnetic fields that give slippage and free-play in the reverse direction. When nine is positive 3 and 6 are both negative and visa versa. Nine is the central axis of control.

# HIGHER DIMENSIONS ARE COMPRESSED

I firmly believe that all the higher dimensions are compressed and combined together into One. I refer to this higher dimension as the Omni-dimension. This Omni-dimension is revealed by the discrete number pattern  $+3 -9 +6; -6 +9 -3; +3 -9 +6$ . Because Spirit and magnetism are inseparable and always occur together at the same time the 4th and 5th dimension are really One. The magnetic field occupies the 4th dimension and the Spirit Flux exist in the 5th dimension. Only magnetism can give slippage and free play to Spirit by moving simultaneously in the opposite direction. Spirit emanating linearly in a straight line is the source for the curvature and warpage of the universe.

Numbers are real and alive. When Spirit pierces the Decoqubit's torus skin a discrete number is created along with curvature. Utilizing Vortex Based Mathematics, I am able to do Spirit Density mapping and observe the longest mean-free pathway for electricity or any other continuous medium. Superfluidity is the result regardless of the material, be it air, water, plasma, or even an entire solar system thereby achieving macroscopic quantum results. The Decoqubit torid number map is the blueprint of the universe.

The number Nine represents the W-Axis of Spirit which penetrates everything, is irresistible, and is known as the Dandelion Lion Puff Principle shown above.

Every coil always has an associated Spiritual Flux and magnetic field. These two are inseparable. There are two types of fields. Toroidal fields and Poloidal fields. Conventionally wound motor coils use toroidal fields while fusion reactors use Poloidal fields. The Decoqubit Holographic Hypersphere creates a Poloidal field.

The Diamond Quantum Tiles crystal lattice reticulation pattern (net like pattern) is a result from Spirit emanating. Professor Scott Nelson refers to discrete numbers as being stationary vector interstices. There is one discrete number per DQT. I have shifted all of the numbers onto the face of the tiles for easier viewing. Every time Spirit pierces the Torus it rarefies the skin and creates a discrete number. The Decoqubit toroid number map defines what a quantum is in perfect terms during ad infinitum exponential growth. Within the Decoqubit holographic hypercomputer both the hardware and the software are one and the same because of the instantaneous time component.

# The Botanical Integer Lattice

A daisy integer matrix has an unusual mathematical property; it serves as a simple and naturally efficient prime number sieve. The data reveal a mutual dependency between prime numbers and Fibonacci numbers, and the natural and central symmetry of prime numbers within three-dimensional objects. Botanical objects literally contain a natural prime number generating algorithm within their structural growth algorithms.

A hypothetical distribution of growth units on the surface of a cone, showing the distribution of the first 6 consecutive plant growth subunits on the surface of a cone (after Conway and Guy, *The Book of Numbers*). Figure (a) shows that the subunits have a specific position on the surface of the cone. Consecutive subunits (e.g., florets) diverge from each other in succession by the same angle in relation to center (b). This growth process produces sets of opposing spirals on the surface of the object and a botanical matrix of integers in space and time (c).

Use a pair of scissors to cut along the dotted lines. Join the left and right ends of the matrix (columns #1 and #34, respectively) to form a cylinder or other shapes, which are possible with a stretchable spreadsheet substance such as rubber.

Only 3 and 6 can respond fast enough to the number 9 to give slippage and free play. This illustration of the 3, 6, 9 Family Number Group reveals when and where Spirit and magnetism pierce and rarefy the Torus skin, and is a result of the squaring of prime number 3 which makes a 5-D Omni-dimensional hypersphere. Spirit and magnetism are the driving force behind life and the source of phyllotaxis which is the spiraling growth patterns unfolding within plants, people, and planets.

There are no computer scientists today who understands the palindrome 3•9•6; 6•9•3; 3•9•6 which is the Omni-dimensional computer language that obsoletes the primitive 2D binary code used today by Apple and the PC. Little do they know that the binary code is a periodic 6 digit recursion repeating pattern.

All chessboards contain 64 tiles. The Mobius Circuit starts anew at 64. The Decoqubit Holographic Hypersphere is God's chessboard. The fabric of the universe is elastic and cannot be ripped or torn apart because it is made out of diagonals.

# MOTION, VIBRATION AND TIME

Spirit emanates in thirds...life and propulsion systems mimic nature's design. +3 -9 +6; -6 +9 -3; +3 -9 +6 . . . . the pulse of the in and out, the breath of the Spirit.

Spirit's positive emanations originating from the zero occur along the W-axis and are the source of all motion, vibration and time.

Every multiplication series has a counter directional multiplication series on the same plane that is the opposite polarity and opposite direction.

Spirit is irresistible, penetrates everything, and is the source of all motion, vibration, and time.

Intergalactic Space Power Propulsion System

Poloidal Pinch at the Primal Point of Unity is where Spirit originates as it travels out in a straight line along the W-axis. At the Primal Point of Unity everything inverts. The vortex renews, cleans and purifies the environment. Compression shock waves ring throughout the Torus hypersphere.

Poloidal Pinch can be used as an intergalactic space power propulsion warp drive. The Flux Thruster Atom Pulser is a nozzle which is steered by the micro underpinning nested vortices, which act as gimbals to control space vehicle navigation.

## THE MOBIUS CIRCUITS ARE A FLUID PUMP

Mankind incorrectly sees only one counting system and does not realize that the base ten system is composed of two separate realities. The 1-2-4-8-7-5 is an unbroken coil that is a bounded infinity of duration. This is the pathway that superconductivity and superfluidity takes as energy is flowing into the future. All continuous mediums follow this pathway be it air, water, electricity or even a solar system. This is scientifically referred to as the longest mean free pathway, the distance that a molecule travels without collisions, with no resistance.

## THIS APPLIES TO ALL MICROBIOLOGICAL SYSTEMS AS WELL

Two worlds combined into one. The 1-2-4-8-7-5 Mobius Circuit posses horizontal symmetry, while the 3•9•6 is in vertical opposition. This juxtaposition fully reveals how creation was brought into being and is continually being renewed by Spirit's emanations. This is the link between heaven and earth.

# THE BINARY CODE IS TRIANGULATED

The binary code which is the most widely utilized operating system in computer science today is falsely believed to be an endless progression of numbers. The truth is that just like everything else in our physical world made out of concrete mass the binary code warps and returns upon itself. This is a bounded infinity of duration but not an infinity of direction, a closed system of renewal, an ecological system of purification. Periodic, cyclic, endless in the past and endless in the future, life without end, evolving from the W-axis.

# THE BINARY TRIPLET

BECAUSE THE BINARY CODE IS PERIODIC  
MOORE'S LAW DOES NOT APPLY

THE BINARY CODE IS A CLOSED RACE TRACK COURSE

This original illustration done in 1986 by the mechanical engineer Scott Gossler showing that Abhá Cypher is triangulated. The significance of this discovery is that the binary code in reality is not binary at all but instead exists on a triangulated lattice. The binary code and all duality is just an optical illusion. The minimum number of parts in any set is three. Two parts physical and one part invisible.

# PERFECT OVERLAPPING REGISTRATION

## Encrypted Knowledge

God's Abhá Cypher is a spectrometer that contains 18 numbers but only half of them are visible. The rest is hidden by being folded over upon themselves as a result of perfect registration.

Energy flowing into the future always follows this superfluid topological pathway. This is natures coordinate system revealed by the

Decoqubit torus.

The dark green is the left descending Möbius Circuit  $+1, -2, +4, -8, +7, -5 \dots$  and the light green is the right ascending Möbius Circuit  $-1, +2, -4, +8, -7, +5 \dots$

There are really two Möbius Circuits with one hidden behind the other because of perfect registration.

# 3 & 6 ARE THE FURTHEST MOST EXTREME DISTANCES FROM EACH OTHER

$$360^\circ \div 40^\circ = 9^\circ$$

Spirit cleaves in twain the numbers three and six.  
The triangle, Diamond, and hexagon all occur in Phase

Only by squaring prime numbers are you able to achieve a higher dimensional base number counting system. All other systems such as the binary code, hexadecimal, base twelve, and base fifteen, etc. are completely false and a manmade error. There exists in 3-D reality only radix 10, 26, 50, 122 . . . etc

which makes the perfect Decoqubit Holographic Hypersphere. All of the higher dimensions are compressed down into a single one represented by the Omni-dimension, the Equipotential Major Groove gap space, 3•9•6; 6•9•3; 3•9•6.

## THE BINARY TRIPLET

Both male and female can be positive or negative but are always the same polarity in conjunction with each other. The standard model of duality with the Yin and Yang being comprised of two parts is inaccurate. There are really three parts to the Yin and Yang. The key to harmony and well being in our personal relationships as husband and wife are synchronization to the invisible 9 which is Spirit. The number nine is the control and invisible 3rd element represented by the S-curve inside the yin and yang.

The Yin and Yang is an optical illusion, as it appears to be a duality when in reality it is a

binary triplet. Nine is centered at the Apex of three and six, and is always invisible. The oscillating three and six never touch. What matters most is that 3 and 6 are both on and off at the same time by being coupled to the 9 and are thus in-sync.

Only the 3 and 6 magnetic fields can instantaneously respond to provide slippage and free play to the Number 9 Spiritual Flux. The higher dimensional 3•9•6 Flux-Fields pierce and impart spin to the 3D counter-spiraling 1-2-4-8-7-5 Möbius Circuits, which always comes in pairs.

Underpinning Nested Vortices are responsible for gender. Male implodes within and female explodes and express out.

The feminine is visible everywhere throughout the world and is seen as a hexagon such as a tortoise shell. Masculine is the triangle which is a negative vortex. Just as man is hidden by his beard the woman is the white

whole that is revealed by her beauty. Both male and female occur in conjunction and in the eyes of God are equal. They are the same but different. One cannot exist without the other. Three is male, six is the female. They are both worshiping the Nine. This is a two stage surge pump that is being driven by the third component at the center. They joined through Spirit.

# EVERYTHING STARTS FROM THE INSIDE OUT

The Decoqubit consists of a 3D dual non-cartesian X-Y-Z coordinate system with a separate Omni-Dimensional W-Axis.

Left Handed Coordinates

The Polar Number Mates are always separated by three steps of the Möbius Circuit. 1,8; 2,7; 4,5 are all aligned on a horizontal plane. The Decoqubit's torus skin is composed from these number mate pairs. When 1 and 8 are vertical 4 and 5 are horizontal and 2 and 7 are invisible. These three X, Y, and Z axes cycle and rotate from one to another. This bilateral symmetry is a result of thirds and is not a duality.

# POLAR NUMBER MATE BUILDING BLOCKS

## TIME IS A BOUNDED INFINITY ON THE THIRD DIMENSION

The classic infinity symbol, lazy eight, resting on its side, in reality has six intersecting numbered positions that are 1-2-4-7-5 which curve at their intersection points. Each one of these points are the beginning of a multiplication series. Polar Number Mates always equal 9 and are perfect mirrors. The center of the Mobius Circuit is not on the center of the circle which is very significant.

DISCRETE NUMBERS ARE GEARS THAT MUST MESH TOGETHER

# ENDLESS SPIN-ARRAYED MOTION

The Mobius Circuit's center is off-center. The zero is centered vertically but not horizontally.

The center of a circle and the location of zero on the Mobius Circuit are different locations just as equilibrium does not mean the same thing as balance.

Through spin-array of the Mobius Circuit's the central hole of the vertical axis, within the hypersphere, is put back in the center of the circle.

Movement puts the hole back into the center. There are check valves that keep the flow from moving backwards. This is called a ratchet, oneway positive systematic flow.

Without Spirit's positive emanations everything would cease to exist.

The number 9 reigns supreme because it is the crown at the highest position. The vertical alignment of the number 9 over the zero is a perfect spindle linking the Diamond and the gyroscope together.

Spirit's Flux is what is driving magnetism and together they are what is cutting the Mobius Circuit's to create the forwards motion of electricity.

The number 9 is orthogonal to the zero, while everything else is horizontal. Thus, Spirit is always perpendicular in its relationship to the third-dimension.

It inflates and distends all matter. The ratio is 1/6. Bilateral symmetry is the result of 9 aligning up over Zero.

# INFINITIES EPICENTER

Every Black Hole Inverts and then Connects to a White Hole because of Toroidal Pinch.

The mirrored Polar Number Mates 1&8, 2&7, and 4&5 represent the cross section axes, in 3D space, of the X-Y-Z planes of the Decoquibit superluminal holographic hypersphere. Prime number 3 squared creates the Base-10 counting system. There is a critical **Timing Component** correlation between the discrete numbers and the tile distance from the number nine W-axis which is expressed by the Diamond Quantum Tiles (DQT's) surface topology upon the torus skin.

Spirit is Always Surrounded By Magnetic Fields Traveling in the Opposite Direction in a Ratio of One Part Spirit to Two Parts Magnetism

THE STANDARD CARTESIAN COORDINATE SYSTEM IS VERY PRIMITIVE BECAUSE IT IS ONLY 2D

In map making cartographers use the conventional mapping system called the Cartesian coordinate system. Only the Vortex Based Mathematics coordinate System is a true 3-D map of the universe because it uses a dual coordinate system coupled the inverse square law.

The Cartesian coordinate system is composed from squares and the Dual coordinate system is composed from Diamonds. By using Diamonds instead of squares my maps are elastic and contain 100% more data. Diamonds cannot be ripped or torn apart where as squares have no give.

The Decoqubit Hypersphere is composed from the Dual coordinate system. Fifty percent of the Diamond Quantum Tiles (DQT's) are positive and the other fifty percent DQT's are negative.

Spirit's positive emanations results in magnetic negative draft counter space in the opposite direction.

Everything is created from the Primal Point of Unity at the center. There are many names for the center such as Toroidal Pinch, God's Eye, and Zero which is an aperture.

## The Three Planes of 3D Space

There are 3 different green line lengths which compose the Möbius Circuit. From 1 to 2, 2 to 4, and 4 to 8. Each one of these lengths represent a different X, Y, Z axis in space along with a time-dependent component.

# 5D Heaven is Entwined with 3D Earth

5D Eternal Heaven is entwined with 3D contingent and dependent Earth. The 5th dimension is Omni-dimensional. The 4th & 5th dimension occur simultaneously. All the higher dimensions above the 3rd are combined together into one and occupy the central gap space. The gap space displaces and distends the two Möbius Circuits apart and this is where the underpinning Nested Vortices occur.

## God is Hiding in Plain Sight

Discrete numbers reveal a masterplan, proving that we are not alone. The Most Great Name of God (MGN) is Bahá' and all of its 360 derivatives with the highest superlative case being 'Abhá. The Abhá kingdom is the invisible, Divine, Heavenly world. Abhá translates into several meanings including Splendor, Wondrous, and Luminous. Bahá means Glory, Light, and Value. It is through the agency of the MGN that creation was brought into being and is being constantly renewed. The diamond and the number 9 are all generated from the MGN and are vertically aligned with W-axis.

These are the first black and white computer images ever done on a Mac SE around 1985 by Scott Gosler showing the relationship of the Abhá Cypher Primer to the Torus Hypersphere where the holes must be aligned together.

## BILATERAL SYMMETRY OF NUMBERS IS HIDDEN IN PLAIN SIGHT

The fact that the base 10 decimal system is exhibiting parity is the tip-off that decimal counting numbers have a direct tie-in connection to physics. There is a hidden physical component to discrete numbers and all mathematical functions. Only Vortex Based Mathematics is capable of harnessing Spirit's invisible energy which is emanating from where the zero is located. The Möbius Circuit is the archetypal blueprint for the shape of the Universe which is a Decoqubit hypersphere. Seamless base number counting systems must all be generated by a prime number squared which results in no rips or tears mathematically.

# Prime Numbers Squared: The Creation Equation

## THE TRUE ORIGIN OF THE RADIX-10 COUNTING SYSTEM

The first true prime number is 3 that when squared ( $3^2$ ) creates the Radix-10 base number counting system. Radix-26 is the next true 3D base number counting system generated from  $5^2$ . Then Radix-50 is the next true 3D base number counting system generated from  $7^2$ .

Any non prime number cannot be squared and will not produce a 3D fully dimensionalized base number counting system. In other words these base number counting system will not be symmetrical on all axes.

Every computer scientist, number theorist, hacker, and cryptologist has failed to discover

that the Decimal system is of Divine origin and there is only a hand full of true 3D base number counting systems. The present day computer processing systems such as the Binary Code are two dimensional at best and are extremely crude. Only when a prime number is squared does the base number counting system become fully dimensionalized and seamless on all X, Y, Z, and W Axes. The Decoqubit is noiseless, error-free and perfect. It reveals momentum in numbers and allows us to see energy at work inside the hypersphere.

# ANOTHER WORLD AND ANOTHER DIMENSION

The Radix-10 decimal system is composed of two distinctly separate worlds moving through space in two distinctly different manners.

The third dimension is the 1-2-4-8-7-5 surface topology of the torus, and the 3•9•6 is Omni-Dimensional.

The **pumping action** of the perpendicular 3•9•6 Flux-fields causes the gliding action of the 1-2-4-8-7-5 Möbius Circuits.

**Time is an irreversible ratchet on the third dimension.**

# AFTER THE 3RD DIMENSION ALL OF THE HIGHER DIMENSIONS BECOME COMPRESSED TOGETHER.

Everything compresses into a seamless hologram and scales from micro to macro. Regardless of size you always have superfluidity. This hologram is in the shape of a hypersphere which is known as a torus. What is unique and so important is that the higher dimensional Flux-fields are Poloidal and not toroidal.

Everyone falsely believes that the binary code is binary. As seen in the illustration above  $2^n$  is on a triangulated lattice which is based upon thirds and is not a duality. There is nothing binary about the binary code. The angle of the binary code is always  $120^\circ$  and  $240^\circ$ . The binary code is based upon thirds.

## TOROIDAL NUMBER MAP

In the base ten system we have 3 hyper-spheres which are cyclical. Vortex Based Mathematics show how both electric and the Spirit/magnetic are separate time frame event moment of occurrences. Each number is created by 2 different numbers. Each torus is made of the other two.

Electricity goes in opposite counter spiraling directions and the Spirit/magnetic travels along the W-axis in the form of underpinning nested vortices.

The Spirit/magnetic higher dimensional Flux-field is tangential to the electric Möbius Circuits. The Flux-field is orthogonal which is also referred to by the many names of perpendicular, right angle, transverse, tangential, etc.

# THE SCIENTIFIC TERM FOR A SHEAR IS WORLD BOUNDARY CONDITION LINE

The Electron Harmonic Shear is an impenetrable fortress and forces the energy to flow diagonally in the shape of a pinwheel. Hence, the electrical energy is moving through the sides of the **Diamond Quantum Tiles** (DQT's) and not through the corners.

The Mobius Circuits become a trough that the electrical energy flows in. The numerical value of the **shear** always stays the same and never changes for each of the three hypersphere toroids.

The Electron Harmonic Shear is a wall, barrier, forbidden zone, uncrossable, natural insulator, that prevents shorting out and short circuiting. It is responsible for removing all parasitics, friction, resistance, random collisions, hysterics, and entropy. The Electron Harmonic Shear is responsible for tuning any continuous medium such as air, water, plasma, and electricity into a super conducting superfluid.

TORUS SHEAR FOUR

TORUS SHEAR SEVEN

# THE DECOQUBIT IS THE RESULT OF SQUARING WORLD BOUNDARY CONDITIONS ARE DEPENDENT ON SHEARS FOR THEIR CONTINUING EXISTENCE

## TORUS SHEAR **ONE**

+1 X -1 = 1  
-5 X +2 = 10, 1 + 0 = 1  
+7 X -4 = 28, 2 + 8 = 10 = 1 + 0 = 1  
-8 X +8 = 64, 6 + 4 = 10 = 1 + 0 = 1  
+4 X -7 = 28, 2 + 8 = 10 = 1 + 0 = 1  
-2 X +5 = 10, 1 + 0 = 1

When two adjacent numbers are on each side of the electron harmonic shear and are multiplied together they will always equal the same value no matter what, period.

In the base ten hypersphere there are only three harmonic electron shears which are 1, 4, 7.

It is rather fascinating how the hyperspheres cycle from one to another and then back to it self revealing a cycle based upon thirds.

1 X 1 = 1; 4 x 7 = 2, 2 + 8 = 10, 1 + 0 = 1  
4 x 4 = 16, 1 + 6 = 7; 1 X 7 = 7  
7 X 7 = 49, 4 + 9 = 13, 1 + 3 = 4; 1 X 4 = 4

These are the three permutations that result in the triangulation of the base 10 Decoqubit torus hypersphere.

Every torus is composted from the other two. Squaring is the relationship of time, distance which is space and amplitude. Any two hyperspheres when multiplied together equal the third torus squared.

## TORUS SHEAR **FOUR**

+1 X -4 = 4  
-5 X +8 = 40, 4 + 0 = 4  
+7 X -7 = 49, 4 + 9 = 13 = 1 + 3 = 4  
-8 X +5 = 40, 4 + 0 = 4  
+4 X -1 = 4  
-2 X +2 = 4

## TORUS SHEAR **SEVEN**

+1 X -7 = 7  
-5 X +5 = 25, 2 + 5 = 7  
+7 X -1 = 7  
-8 X +2 = 16, 1 + 6 = 7  
+4 X -4 = 16, 1 + 6 = 7  
-2 X +8 = 16, 1 + 6 = 7

Surprisingly, while it appears that there are numerous gap spaces within the torus, in reality there is only one gap space because they all connect together within the interior. Again, the same applies for the electron shear, that there is only one.

## Natural Insulation

Everything has a hidden grain inside it. The electron sheer is a great divide that separates everything and can never be crossed. In astrophysics this is called a world boundary condition line. It is a forbidden zone impossible to cross. I use the electron shear to harmonically replace rubber and shellack insulation coating on coil winding wire. The electron sheer removes friction, resistance, random collisions, hysteresis, parasitics, and electrical noise. The beauty of the electron sheer is that it always equals unity. The electron sheer eliminates all entropy.

## Circle of Fifths Winding

The circle of fifths is a star generated from multiples of 4 or 5. Starting at 9 you wind to 4, then 8, 3, 7, 2, 6, 1, 5, 9. A conventional toroid motor coil places the windings side-by-side and is based upon how many turns and wraps are used to determine the magnetic field output. This results in a toroidal magnetic field. A Rodin coil instead is wound on a very gradual slope with a shallower incline resulting in poloidal magnetic fields by passing where you began and going around many times before returning from where you started. It takes many turns before the conductors abut side-by-side against each other. This creates a harmonic electron shear that serves to create natural insulation without the requirement of rubber or shellac. In music this is referred to as the circle of fifths. **In Rodin coil design it removes all parasitics, friction and resistance. A properly made Rodin coil has no hysteresis.**

This is the biggest secret of the Universe that has ever existed.  
This is the missing link between the torus, arithmetic, particle  
physics and the Most Great Name of God.

This breakthrough illustration was original done by Scott Gosler who was my chief mechanical engineer at the time. It is the priceless bridge that connects the Abhá Cypher (VW symbol) to the DECOQUBIT (Torus). When Scott lined up the two symbols together it immediately became mentally clear to me that there was an even ratio of one number per every tile. Vortex Based Mathematics is the mathematical relationship combining arithmetic and surface typology which eventually evolved into the toroid number map.

## ELIMINATING MANMADE MISTAKES AND ERRORS WHEN DEALING WITH THE HIGHER DIMENSIONAL FLUX-FIELDS

**3.9.6; 6.9.3; 3.9.6**

My team's goal was to make an Over Unity free energy machine connecting the Most Great Name of God Bahá and particle physics together. I immediately realized that there was a relationship of one number to one tile based upon this drawing.

3.9.6 being the combination of Spirit and magnetism together is a principle missed by everyone. This Flux-field offsets and displaces, everything and is the source of all motion, vibration, and time.

Remember, that this illustration is combining all of the elements of the known universe together into one Unicity. Revealed here are surface topology, arithmetic, sacred geometry, calculus, which are all being combined together with a time component. This is the legend and key or God's Rosetta Stone if you will.

Scott was brilliant in his understanding and explanations of the hole in the center that were merged together in these overlapping two symbols which clearly elucidates upon the cosmology of the universe, which is constantly renewing itself while compressing and decompressing.

# Analysis of the Rodin Coil and it's Applications

Mr. Rodin's patterns illustrate the rich arena of study that remains immediately accessible to research, doubtless any discoveries made in answering these questions will result in new areas of study to explore.

The more revolutionary applications of the Rodin Coil's design ultimate potential technological impact is, as previously discussed, enormous.

Rodin Coil motors would be useful in any application where energy consumption must be limited, such as marine, caravan, and space environments where available power sources are restricted.

Rodin Coil antennae would be useful in any application where sensitivity to a particular frequency was important.

Portable communication devices for use in a wide variety of applications should benefit, since power requirements for boosting the antenna signals should be greatly reduced from standard antenna designs.

Rodin coils increased magnetic field at the center could result in more efficient, lower weight transformers.

The Rodin Coil will usher in a new age of technology surpassing those brought on by such inventions as the steam engine, the internal combustion engine, and the electric power generator.

## THE UNIVERSE IS AN ECOLOGICAL REPROCESSING SYSTEM OF RENEWAL

Every pulsar has a hole in the center. This hole also functions as heat sync by exhausting heat into the outer ergosphere. Everything must maintain a constant temperature including a pulsar which would incinerate and burn out if it was to overheat. A pulsar is using stars and planets to bathe itself in order to maintain a constant temperature and keep itself cool. The Palindrome 3•9•6; 6•9•3 Spirit Flux-fields are responsible for this heat dissipation vortex nozzle. If the pulsar's temperature fluctuated too high or too low it would immediately self destruct. Modern science is only now becoming aware that a macro scale quantum world exists on a gross scale. Even pulsars have a superfluid lattice that is macroscopically superconducting. This is life's process of renewal.

Compression/decompression, implosion/explosion, negative vortice/positive vortice, black hole/white hole, male/female are all the embodiment on the 3rd dimension of Spirit's emanating from the higher Omni-dimension. This cascade of Spirit is famously renowned by the ecstatic state of Nirvana which is the apex of consciousness.

A pulsar when observed by utilizing Vortex Based Mathematics is a torus coil in the form of a perfect crystal lattice structure. It stretches and gives without breaking and can never be ripped or torn. This indestructible torus hypersphere is eternal.

It was created by the breath of God. This inaudible sound can be heard everywhere in nature. Every life form is taping into God's invisible essence.

## THE VORTEX WELL IS A FUNNEL COMPOSED FROM MICRO UNDERPINNING NESTED VORTICES

If there is not a hole in the middle of a moving dynamic system it will shut down and cease to exist because of incineration from over heating. Heat dissipation is how the universe works. Everything maintains its existence by keeping a constant temperature that does not fluctuate beyond a small margin from the human body to a black hole in the center of our Milky Way galaxy. Only magnetism responds quick enough to Spirit to

give slippage and free play. Our bodies are made out of stardust from countless blackholes of the past. This is an ecological system of renewal that circulates based upon compression/decompression. This process is driven at the vertex which is the third component. The result is an optical illusion that resembles a duality when in reality it is a binary triplet. Even the yin and yang symbol has 3 parts.

There are not endless higher dimensions above the 3rd dimension. All of the higher dimensions above the 3rd dimension are compacted, compressed, and folded together into one Omni-dimension.

In base 10 the 3.9.6 6.9.3 is an invisible, not seen, higher dimensional, Flux-field of one part Spirit and two parts magnetism. This is called the Equipotential Major Groove gap space. This gap space is always left alone and no copper wire conductor on the Rodin Coil is ever placed there.

This gap space is always empty and thereby allows the eddy currents of the underpinning nested vortices to activate. This gap space always exists in-between the super conducting 1-2-4-8-7-5 mobius circuits.

Only prime numbers squared base number counting systems create a hologram compacting all of the higher dimensions together into a perfect Omni-dimensional Hypersphere (torus).

If any number other than a prime is squared the result will be catastrophic. The result will be a tear in the torus skin and the great circles of the X, Y, Z axes will be broken.

## THE RODIN COIL HAS ZERO ENTROPY (DISORDER) NO RESISTANCE & NO FRICTION

The Decoqubit is the longest mean free pathway of least resistance. Through following the Mobius Circuits of the Decoqubit all resistance is eliminated. The Mobius Circuits provide superconductivity or, depending on the medium or material, superfluidity. Energy is self-insulating when it follows the Decoqubit geometric pathway. Marko has figured

out how to get rid of hysteresis, parasitics and random collisions through uncovering the conduit and natural pathway of energy flow. Because every numbered Diamond Quantum Tile has an up, down, left, right, front and back, Marko is able to use this as a quantum supercomputer for information storage and retrieval.

Every time you square a consecutive Prime Number  
you increase the Möbius Circuit by two.

The torus at the top has a well. The well is crucial for good health. The well is a funnel that is compressing and decompressing in a two-stage surge pump. The center aperture of the torus is a nozzle. In the Bahá'í Faith scriptures this is referred to as the Primal Point. It has also been called the

Eye of God, Toroidal Pinch, Z-Pinch, saddle mirror symmetry coils ... etc. The Dandelion Puff Principle explains how Spirit is emanating from this constriction point. As Spirit shoots out it is traveling in a straight line from the inner diameter to the outer diameter in all directions. When Spirit pops through the torus skin it rarefies the surface topology and creates a counting number.

# Spires Move in Perfect Equilibrium

Every time the Möbius Circuit winding passes itself it changes to another color.

## BALANCING THE ELECTRICAL LOAD

In electrical distribution if the electricity is out of phase it will create resistance, parasitics, and hysteresis. There are different approaches to solving this problem such as Active Load Balancing. I have found a very simple solution to this problem. The Rodin Coil is an air core coil and has no iron core in the center. By following the 1-2-4-8-7-5 Möbius Circuit pathway the electrical load is perfectly balanced and evenly distributed between

the circuit pairs by utilizing Spirit's three phase shift event moment of activation. In this Rodin Coil winding map of one Möbius Circuit conductor there is a perfect Chinese finger puzzle where the harder you pull the more difficult it is to release. In this winding pattern the center of the conductor is always flanked on both sides by its furthest most opposite ends in perfect equilibrium. This eliminates all counter-electromotive force back EMF.

# CONVENTIONAL WOUND COILS VS THE RODIN COIL

The problem made today by most people when designing a Rodin Coil is that they are confused by the optical illusion of the two circuits which have after making many revolutions around the coil only then do they finally lay side by side. They confuse together these two distinctly separate circuits. This circle of fifths, longest mean free pathway of least resistance is a much less acute angle than conventionally wound toroid coils. Conventional wound torrid coils create toroidal fields but the Rodin Coil generates a poloidal field that is aimed at the center of the coil like a pinwheel. It has been said by many others

that they have been able to get the Rodin Coil to self-resonate. The Rodin Coil has also been utilized as a capacitor and is capable of lighting LED's far below their rated value. It has been verified numerous times that the Rodin Coil is producing Over Unity free energy which is not coming from nowhere but instead is pouring out from the Omni-dimension and is called Spirit. It can run an entire home or even an industrial complex. Because the Rodin Coil is a nozzle it can be used for space power propulsion and makes mankind intergalactic citizens.

## ONE CIRCUIT, SHOWING THE WINDINGS

The Spires are a result of the windings, like different gears that connect they show the different pathways and its equilibrium, but it is only ONE mobius circuit. This hidden lattice emanates from the center creating our 3D reality.

This again is only one Möbius Circuit. Every time it threads through it creates a new spire which I have shown in the sequence order: red, blue, green, yellow, and then back to red again. And each angle moves like a Penrose triangle which folds in on itself.

This quantum mechanics spin array creates perfect equilibrium movement, no pitch-yaw, no deviation, no friction. This is the a perfect over unity energy devise which works in harmony with nature's Divine Design.

While it is an optical illusion that it appears to be multiple gap spaces in the center of the Möbius Circuits and that there are numerous harmonic electron shears on the outskirts of the mobius circuits in reality there is only one.

# How To Correctly Wind A Rodin Coil

There are many key component features that must be incorporated to create a Rodin Coil that superconducts with no resistance. These are:

1. Closed loop Möbius Circuits that always comes in pairs with the current flowing in opposite directions. An input and output is unnecessary. I personally do not use stranded wire and prefer a plasma Rodin Coil with a changing aspect ratio. The Rodin Coil is a superconductor and can be made out of any continuous medium. Eventually, I believe that the Rodin Coil will be made on a molecular level using the atoms themselves in a quantum array.
2. The Equipotential Major Groove gap space which is always located in the center. This is where the higher dimensional Flux-fields underpinning nested vortices occur.
3. The harmonic Electron Shear is located at the outskirts of the Möbius Circuits as the result of being wound in spires. This creates a natural insulation along the world boundary condition. This is an invisible grain. Shellac or rubber coating insulation is unnecessary in a truly accurately designed Rodin Coil.
4. There are three Family Number Group phase change moments of event occurrences where only one conductor is energized alone, and then the second conductor is energized, then both conductors stay off while the higher-dimensional gap space turns on.

None of these designs of these Rodin Coil are done to my specifications. Why? Because the back-bone of the Möbius Circuits need to abut so as to produce the Electron Harmonic Shear. The math is correct and the diagrams are correct. Everyone cuts corners because it is easier to use a single gauge wire which is wrong.

Present day understanding fallaciously believes that the base ten number counting system is inanimate. It was Scott Gosler who discovered that there are two separate components to base ten. The coil and its associated higher dimensional Flux-field. Numbers don't move. Only the mathematical functions are moving. Professor Scot Nelson an expert in Vortex Based Mathematics refers to numbers as being stationary vector interstices. All mathematics is artifacts of Spirit's positive emanations.

## IDENTIFYING A SHEAR

8	8	3	9	6	6	9	3	3	8	8
7	4	8	7	5	1	2	4	8	7	4
5	7	8	4	2	1	5	7	8	4	2
6	9	3	3	9	6	6	9	3	3	9

Multiply the numbers directly either side of the world boundary condition line to identify the shear.

$$1 \times 1 = 1$$

$$2 \times 5 = 10$$

$$1 + 0 = 1$$

$$4 \times 7 = 28$$

$$2 + 8 = 10$$

$$1 + 0 = 1$$

An electron harmonic shear is an impermeable insulator.

A shear in a Rodin coil is the result of winding the conductor many times around the torus in spires.

The Decoqubit hypersphere is composed from staggered Underpinning Nested Vortices which are responsible and vitally necessary to achieve quantum superfluidity. These micro vortices can be used for navigation like a gimbal on a spaceship nozzle based upon their activation sequence and firing rate.

## THE ELECTRON SHEAR IS A NATURAL INSULATING WORLD BOUNDARY CONDITION

All continuous mediums the faster they accelerate converge along the 1-2-4-8-7-5 counter spiraling Möbius Circuitry of a torus, be it water, air, electricity, or even plasma generating everything from dimpled red blood cells to the toroidal shape of solar systems.

This is the longest mean free pathway of least resistance without parasitics, friction, or random collision. Hence there is no noise and zero reluctance.

The torus is a superfluid hypersphere that is self-sustaining through its breathing respiration action. This is the diamond grain crystal matrix lattice for super conductivity. By my being able to introduce discrete numbers to the surface topology I can see the past, present, and future movement of energy flowing into the future – obsoleting the Heisenberg uncertainty principle because discreet numbers are non invasive.

The torus shear functions as an electron shear which serves to insulate energy and to keep it from short circuiting. This is a harmonic barrier and replaces other forms of insulation such as rubber or shellac coatings on conductors. Everything has an invisible grain within it as a result from this shearing action. This grain is seamlessly composed from Diamond Quantum Tiles (DQT's).

The electron shear is a harmonic fence that always runs in-between the Möbius Circuits by hemming them in on their outskirts. This is known as a world boundary condition. There is only one electron harmonic shear that occurs throughout the Torus from the Möbius Circuits taking multiple spire revolutions.

The universe has a preferred frame of reference which is consistent at any scale this is true both spiritually, for the soul which is defined in its relation to its Creator, and physically, as objects accelerate toward the center of mass. Nothing exists alone; truth is defined by relationships.

Let us picture and Egyptian pyramid. Here we have an example of what Marko Rodin describes as the preferred frame of reference in physical terms. The peak of the pyramid is a center of mass from which Spirit emits. The pyramid close to the point is narrow; at the base it's wide. As we approach the point there is convergence. Since all movement is in relation to this point, movement is a flow of compression and decompression. If we imagine this movement taking place on the pyramid's sides, and then imagine a line from the point to the ground, reaching the ground at a 90 degree angle, to be the axis of the pyramid, we find that our movement is never on the same line as the axis, but described around it.

This model is also consistent with Einstein's physics, which refers to gravity as acceleration due to the curvature of space-time. In fact, all "matter" is actually a curvature of space-time. Therefore, there is nothing but space-time and motion, which is pretty much the same thing, and, again, there is curvature and acceleration towards the center of "mass".

# THE VORTEX BASED MATHEMATICS GREAT PYRAMID NUMBER MAP

The Underpinning Nested Vortices of the higher dimensional Flux-fields are all focused on the central axis of the pyramid Cap Stone which is represented by the red color number 9. There are three Great Pyramid number maps.

There are six multiplication series of the Great Pyramid and the Decoqubit Hypersphere that exist upon the third dimension in the physical world of Creation. These

multiplication series are seen along the edges of the Great Pyramid and move into the interior as well where the invisible Z axis exist. The Z axis is made visibly manifest through observing the waves of Nine being generated in every direction by the Diamond Quantum Tiles. The W axis is all of the higher dimensions compressed together into one and is revealed by the number Nine Capstone.

## The 1-2-4-8-7-5 Divine Algorithm

At Egyptian archeological digging sites the most frequently found talisman is the Eye of Horus. There are six separate elements that comprise the Eye of Horus. Each one of these elements is a perfect quanta that does

not decay because it is the equation for the Möbius Circuits that compose a self-sustaining hypersphere. The six numbers to which the eye of Horus reduce to are :

## The Mysterious Recurrence of the Most Great Name Ba' for the Egyptian Pyramids

The Ba' Bird is a falcon that always has a human head on it and symbolizes the Soul-man. If the Ba' does not descend to the Pharaoh within three days he will not go to the afterlife.

B = 2 Represents Male Compression

A = 1 Represents the Hamza which is the glottal stop

H = 5 Represents Female Decompression

1-2-5 are the three numbers used for the equation for Spirit

The all seeing Eye of Providence is a dimensional portal made through these three numbers.

The All-Seeing Eye of Providence is the Mystic Word of God because it emanates and is always giving sensory feedback.

# The Falcon of Tutankhamen with Three Suns

# THE SUN ABOVE THE FALCON'S HEAD IS THE NUMBER 9

The two suns grasped in the falcon's feet are 3 and 6.  
The wings of the falcon are the 1-2-4-8-7-5 Mobius Circuits.

Only the 9 lines up vertically over the intersection of the Mobius Circuit which is the Primal Point of Unity. This is always a hole represented by zero.

The Eye of Horus in Egyptology is the most powerful talisman and was frequently worn around the neck as a pendant. There are 6 parts to the Eye of Horus each having a numerical value of 1, 2, 4, 8, 16, 32. When reduced to a single digit this pattern becomes periodic.

The Ba' Bird bestows the soul upon the pharaoh. If it does not descend upon him within three days he does not go to the afterlife. There are more pyramids named after the Ba' than any other.

The comparative case Most Great Name of God from the Bahá'í Faith translates into the meaning Glory, Light or Value. The superlative case of the Most Great Name of God is 'Abhá

which means Wondrous, Splendour, Luminous. There are 360 derivatives of the Most Great Name of God. This is the station of Mahbub (Beloved One) and the Houri (Celestial Maiden) which is the highest invisible spiritual plane of attainment for a man or woman.

He who intonates the precise mystic pronunciation of the Most Great Name of God receives Divine guidance, heavenly assistance, illumination and inspiration. Not shall they know of sun or piercing *cold*.

The Seven Valleys and the Four Valleys of Baha'u'llah

*Translated by Marzieh Gail*

I believe that the number 9 represents the eternal Light. The Bahá'í sacred scriptures has many allegorical references and allusions to this divine, spiritual, energy of God which is denoted by the colour Red, Crimson and Ruby.

Embedded Inside the **Fibonacci Series** are Two Counter Rotating Mobius Circuits with the Equipotential Major Groove Gap Space located in the center.

There are always two counter-spiraling 1-2-4-8-7-5 Mobius Circuits in everything including the Fibonacci series.

The Equipotential Major Groove Gap Space\* contains the Palindrome 3•9•6 6•9•3 higher dimensional Flux-fields which are the source.

\**Equipotential Major Groove Gap Space is the distention that displaces the Mobius Circuits apart and keeps them separated.*

# Fibonacci 1, 1, 2, 3 . . .

The Fibonacci sequence repeats after the 24th number and is arrayed around the circle in 15 degree increments.

3rd dimension is **green** and **blue**

Omni-4th dimension is **red**

The Fibonacci sequences contain one pair of Möbius Circuits based upon every fourth number and moves as noted by the blue and the green 1-2-4-8-7-5. This living matrix is multidimensional because of the 3•9•6 6•9•3 higher dimensional Flux-fields. All numbers taken their 180 degree opposite add or reduce to 9.

# Fibonacci 1, 3, 4 . . .

Nothing exists that does not contain within it the Möbius Circuits and the 3•9•6 6•9•3 higher dimensional Flux-fields including the Fibonacci sequences. 3•9•6 are a completely different world, apart and above.

3rd dimension is green and blue = Mass as the physical world  
Omni-4th dimension is the black = Spirit and Magnetism

# Fibonacci 1, 4, 5 . . .

The blue arrows are flowing counter clockwise and the green is flowing clockwise. Advanced applications are quantum algorithms from plotting the stock market to plotting of biological growth.

Because of perfect registration and calibration there are really 18 numbers hidden in Gods Primer. The other nine numbers are hidden from sight by being blocked from view. It looks like a binary system but it is based on a triplet.

# A Secret Answer...

## How do from the VW symbol to the Tesseract?

In Wikipedia when you look up the 4th dimension you get an illustration of a hypercube and Tesseract. These are very crude renderings of the 4th dimension.

The 3•9•6 with 9 being vertically aligned at the zenith above the zero, and the three and six being played apart, is the secret answer providing the missing information of the Omni-fourth dimensions location in relationship to the Möbius Circuit's position.

Nine is the control, three and six are the results. When nine is positive, three and six are both negative and when nine is negative, three and six are both positive.

This creates the Diamond Grain lattice structure necessary for superconductivity to occur.

The second law of thermodynamics restated differently is for every action there are two simultaneous half opposite equal reactions on the higher 5th/4th dimension. Cleaving in twain based upon positive emanation creates negative draft counter-space which accurately bestows polarity.

True polarity is based upon thirds and is not a duality. Prime numbers represent God by being odd because they are unique and peerless. God is the Single, the One.

# THE 5 TH DIMENSION

THE PRIMAL POINT OF UNITY IS  
THE SOURCE OF SPIRIT'S ORIGIN

The Monolith reveals a higher dimension by being vertically aligned with the W-axis located at the zenith. There is a reason why the number nine is always upright and at the top because it is a gateway between two different worlds. There is an energy flow between Heaven and earth.

The Tesseract is a Hypercube representing the next dimension above the 3-D dimension in conventional science (see link) but is only a gross man-made representation of the higher dimensions.

## Spirit is Reticulating Everything

The Enneagram, 1-2-4-8-7-5 Mobius Circuits, pyramid, torus, hypersphere, Antithesis Nexus Key and God's Spirit Primer are all different perspectives of how Spirit and magnetism occur together to create superfluidity (i.e. superconductivity).

Only magnetism responds quickly enough to give free play and slippage to Spirit which is always moving in the opposite direction. When 9 is positive, 3 and 6 are negative and when 9 is negative, 3 and 6 are both positive. 9 is the control and 3 and 6 are the simultaneous, instantaneous response.

# Enneagram

The **Enneagram** is an ancient and sacred, geometric symbol (often associated with numbers), consisting of an Isosceles Triangles overlaid by a diagonal configuration of interlocking lines. The triangle in the Enneagram is equivalent to the 9-axis and the

oscillating 3-6 (see the Symbol of Enlightenment). The diagonal configuration of interlocking lines is equivalent precisely to the Doubling Circuits and the counter diagonal (antithesis Nexus Key) skin of the Abha Torus.

BOTH of these symbols are different views of the SAME thing looked at from different "points of view"? Or, that different points of view CAN represent EXACTLY the same thing?!

The classic Enneagram is composed from the repeating decimal number pattern of dividing by 7.

There is a palindromic number pattern counter diagonal to the Mobius Circuits upon the Decoqubit torus skin which is **1, 6, 5, 2, 9, 7, 4, 3, 8,** (see right page) from which the Enneagram is composed from.

It is a man made error to connect the 3 and 6 at the base of the pyramid. I always make the connection between the 3 and 9 and 6 and 9 a dotted line because **3.9.6** are a higher dimensional Flux-field composed from Spirit and magnetism.

The relationship of the Greater World to the lower world is revealed by the number 9 being a vertical straight line above the circuit intersection which is the convergence point where Karen placed a diamond to reveal its location.

The Divine Empyrean Heavenly World is orthogonal, perpendicular, tangential, and a right angle to our contingent, lower world.

# The Decoqubit Toroid Number Map

The new Enneagram is also composed from numbers taken off of the skin of the Decoqubit Hypersphere.

Antithesis Nexus

Key Enneagram

1,6,5,2,9,7,4,3,8

We have highlighted the number pattern **1, 6, 5, 2, 9, 7, 4, 3, 8**, from the skin of the torus. We have then arrayed them around a circle. We then connect the 1-2-4-8-7-5 of the Mobius Circuits. The resulting geometric symbol is the classic Enneagram showing that the torus, Mobius Circuits, Antithesis Nexus Key and Enneagram are inextricably connected.

The Antithesis Nexus Key Enneagram is always counter diagonal to the Mobius Circuits and is composed from the Palindrome number pattern **1,6,5,2,9,7,4,3,8,8,3,4,7,9,2,5,6,1**.

This is the connection between the higher Omni-dimensional world of God and the lower three-dimensional world of matter.

The repeating number pattern of dividing by 7 follows the geometric pattern of the Mobius Circuits.

This is not a coincidence!

Dividing by 7 creates a repeating decimal that corresponds to a discrete whole number in a multiplication series.

Dividing by 7 creates multiples of 4:

Do not add together 142857.

Do not round up 142857.

$$142857 = 4$$

$$285714 = 8$$

$$428571 = 3$$

$$571428 = 7$$

$$714285 = 2$$

$$857142 = 6$$

Now you have the solution for converting 142857 to a whole number.

$$1 \div 7 = .142857 = 4$$

$$2 \div 7 = .285714 = 8$$

$$3 \div 7 = .428571 = 3$$

$$4 \div 7 = .571428 = 7$$

$$5 \div 7 = .714285 = 2$$

$$6 \div 7 = .857142 = 6$$

$$7 \div 7 = 1 = 1$$

$$8 \div 7 = 1.142857 = 5$$

$$9 \div 7 = 1.285714 = 9$$

Pi is unquestionably the most popular mathematical enigma known to man.

Whats more everything in science is predicated upon it since it is a physical constant that everything is dependent on.

There are no endless repeating decimals and it is a man made error to round off or to approximate pi. Mankind by always taking pi out to a farther decimal place is nothing but folly.

Not only does mankind not see his error, but he perpetuates it by not realizing that an endless non-repeating decimal is God's own way of saying retract your steps because you have broken one of the utmost cardinal rules of math.

An endless non-repeating decimal is a red flag because mathematics is constructed so perfectly that it cannot be violated. All of the different varying branches of math such as arithmetic, sacred geometry, surface topology, calculus, etc. are consolidated into the Decoqubit Hypersphere.

I have pieced together all of the known functions, calculations, equations and formulas of the universe into one unified object which is the Decoqubit Hypersphere.

It is predicative, perfect, self-coherent, free from error, never redundant, elastic, scaleable from micro to macro, and contains no omissions. It is God's own coordinate system from which anyone can navigate throughout the universe.

The Decoqubit is a gyroscope with its own preferred frame of reference and spacial orientation. Momentum, potential, and kinetic energy are all revealed in the Decoqubit. Heat dissipation from the core of the Decoqubit into the outer ergosphere environment is its function.

The Decoqubit reveals past, present, and future simultaneously and obsoletes the Heisenberg uncertainty principle because discrete numbers are predictive and have their own physical attributes and qualities while not being invasive. Thus what is being observed remains unaffected.

# SPIRIT RETICULATES EVERYTHING

The Decoqubit is the ultimate ideal from which everything else in the universe is patterned after. It is the Divine Standard and incomparable Touch Stone. Without it nothing would exist. All numbers are tethered to the core of the Decoqubit by Spirit. Mathematics is an artifact of Spirit. Everything is imprinted by Spirit and has Spirit's reticulation pattern on it.

# ZERO IS NOT LOCATED ON A NUMBER LINE

There are only nine numbers in base ten because of the missing zero. This is why the mod is always one number less than the base. Base ten is zero through nine, not one to ten.

## ZERO IS NOT A NUMBER

Zero does not exist in a multiplication series. A multiplication series does not begin with zero. Pi, Phi, and all of the other mathematical physical constants are wrong because zero displaces everything. Once it is properly understood when and where zero is located Pi and Phi are no longer endless repeating decimals.

ZERO IS IN THE CENTER

## The Hole is in the Whole

A straight line cannot bisect a circle. There is always an incompressible hole in the middle. This hole offsets and displaces everything else. Zero does not begin a multiplication series nor does it begin a number line. On a circle  $360^\circ$  replaces zero. If you put a zero after  $360^\circ$  it would add another radiant degree thereby resulting in a miss-calculation. Zero is not a number. It is an absence. Base Ten does not consist of ten numbers but only nine. There exists only a handful of true fully dimensionalized base number counting systems which are all generated by prime numbers squared. The binary code, hexadecimal, based twelve, etc. are not at their full potential because they are not operating upon the Omni-dimension.

The DNA is not comprised of two helices but from three with the third helix being invisible and occupying a displacement space called the Major Groove which is located in-between the two helical strands. Nature abhors a vacuum. This Major Groove is not empty, instead it's where information for genetic coding exists. Rodin's Vortex Based Mathematics is a schematic for life, revealing that inside the Major Groove of DNA exists a higher dimensional Bioaetheric Template (Morphogenetic Field) defined by the mathematical number pattern 3, 9, 6, 6, 9, 3 revealing the existence of an All- Coherent higher intelligence guiding evolution.

Selective splicing of novel DNA sequence combinations are able to be performed at will for medical treatment and the elimination of diseases by utilizing these

higher dimensional Flux fields to control DNA cleavage and receptor sites.

Maxwell previously stated that there needs to exist a Monopole to symmetrize all of his electrical equations. Rodin's math is a blueprint that gives us the ability to observe this missing Spirit Monopole in the form of an Inertia Aether Flux represented by the number 9 and its associated magnetic field represented by the numbers 3 & 6 which are perfectly nested in unison within the Major Groove of DNA.

The backbone of DNA's double spiral helix is comprised of phosphates and phosphates are known to always have a negative electric charge and obviously with any negative electric charge there is always going to be an associated magnetic field.

THOMAS BERADEN  
DR. HANS A NEIPER  
BYRON TOWNSEND

Subject: The Rodin Coil

To Whom It May Concern:

Two years ago I met Marko Rodin through a mutual acquaintance. Mr. Rodin shared some of his results with me at that time. It became clear to me that Mr. Rodin's work was a synthesis of numerical patterns which had previously been overlooked by conventional science and mathematics. In hopes of bridging the gap between Mr. Rodin's discoveries and conventional science, I put forth an analytical framework in which mathematical formulae generate the numerical patterns of the Rodin Torus. These formulae suggested that the Rodin Torus lies not just on the surface of the "doughnut" shape, but into the interior as well; in other words, the Rodin Torus is three dimensional.

This mathematical formulation is as yet incomplete, and the physical meaning of these numerical phenomena remain unexplored still. Yet in my career I have several times discovered new mathematical formulations which have led to new products. In the late 1970's I discovered Atomic Modeling which revolutionized computer performance modeling, measurement, and sizing. In the early 1990's I discovered new ways to express the time-dependent behavior of program code, which led to reductions of program code size of 50% of the original size for all programs to which it was applied. I mention these facts merely to convince the reader that my intuition has a history of success in the practical application of new mathematics.

Now I am completely convinced that the Rodin Torus will likewise lead to new and revolutionary advances in art and science. Mr. Rodin's work has suffered from a lack of adequate scientific attention, and I am sure that as the research momentum builds and the proper relationship between the Rodin Torus and conventional science is fully understood, both areas of endeavor will attain new heights. I am very much looking forward to playing a role in this adventure.

# **Analysis of the Rodin Coil and its Applications — Russell P. Blake**

## **Introduction**

I have reviewed previous and current work on the theories of Marko Rodin. Mr. Rodin has discovered a series of regularities in the decimal number system heretofore undocumented in mathematics. These patterns lay out on the surface and within the internal volume of a torus.

A number of scientists and engineers have voluntarily joined with Mr. Rodin over recent years to explore the implications of his findings.

## **The Rodin Coil**

The Rodin Coil is a toroidal—or doughnut-shaped—form wound by wires in a pattern consistent with the number patterns discovered by Mr. Rodin. Toroidal shapes wound with wires are commonly used for inductors in electrical circuits, often for use in transformers. However the pattern of winding in a Rodin Coil is radically different from conventional toroidal coils. Experimenters have produced some samples of the Rodin Coil to measure the effects of this new approach to winding wires around a torus.

To understand these effects it is necessary to review just a little electrical theory. When a current is passing through a wire it creates a magnetic field around the wire. When a wire is coiled like a

cylindrical spring, as though wrapped around a pencil, the magnetic fields from the turns of the coil reinforce each other to increase the strength of the magnetic field. When the coil is bent into a circle, so that the ends meet, the majority of the magnetic force is concentrated inside the coil. This is considered a benefit in electrical circuit design, since stray magnetic fields can upset the operation of other parts of the circuit.

In a conventional coil the windings lay one after another just like the windings of a cylindrical spring. In a Rodin Coil, the windings lie on the surface of the torus, but do not lie consecutively adjacent to each other. Instead they reach along the surface, through the central, doughnut hole area, and 30 degrees short of directly across the torus. This forms, in addition to the wires on the outer surface, a crisscrossing circle of wires in the center of the torus. (The central figure formed by the wires in the doughnut hole is really a polygon of 24 sides for each completed wrap of the coil: so many sides it is considered a circle.)

Due to the central circle of wires in a Rodin Torus, it naturally creates a greatly increased magnetic field in the center of the torus, when compared to a conventional coil wound with the same amount of wire. In addition the field generated

is much more coherent, in the sense of being much more sensitive to a particular frequency of applied current. These properties are the basis for useful applications of the Rodin Coil, as well as for any limitations in its use.

All this having been said, it is worth noting that no one has as yet created a coil precisely conforming to Mr. Rodin's exacting recommendations, all of which derive from the numerical patterns he has discovered in the decimal number system. The effects of a really well constructed Rodin Coil remain untested.

## **Evolutionary Applications**

There are a number of practical applications of the Rodin Coil that have the potential (no pun intended) for producing new, more efficient electrical devices. Producing these devices seems to require in some cases significant engineering effort, but no revolutionary scientific discoveries beyond what is known to date. These seem at first glance to fall into two distinct categories: motors and antennae; other possibilities may also exist.

Before enumerating these practical possibilities, we should mention that they all require using the Rodin Coil in a more or less conventional

fashion. We do not intend here to describe in complete detail how a Rodin Coil is wrapped, as this is covered to some extent in supporting documentation. (Detailed engineering work on Rodin Coil design specification still needs attention.) Here we only wish to point out that in a "real" Rodin Coil, there are two wires used to form the wrap; these are not connected to each other, but rather each wire is connected to itself to complete a loop at the end of the wrap. Thus there is no way to extract current directly from these wires or to energize them directly with an external current. In this section on Evolutionary Applications we divert from the strict Rodin Coil design, and energize the coils in a more conventional fashion, by connecting the ends of the two loops to one or two current sources or sinks, so we can utilize and measure the coil's properties along the lines of conventional electrical engineering. In the next section, on Revolutionary Applications, we revert to the true coil design as envisioned by Mr. Rodin.

### Motors

The increase in magnetic field over a conventional coil that is found with a Rodin Coil has been observed to be limited if the hollow torus is replaced by the ferrite core used in conventional electric motors. The reason is that the ferrite core reaches magnetic saturation, beyond which no additional magnetic field can be produced. Assuming this difficulty can be overcome by judicious choice

of core materials, or that hollow cores can produce enough current, a motor based on the Rodin Coil could be markedly more efficient at generating electrical energy than a conventionally constructed electric motor. (The possibility of a hollow core electric motor is exciting due to the light weight of such a design.) Under this assumption, Rodin Coil motors would be useful in any application where energy consumption must be limited, such as marine, caravan, and space environments where available power sources are restricted; high pollution zones where fossil fuel consumption must be conserved; isolated or unmanned stations with limited fuel capacity and refueling difficulties; and portable motor-driven equipment of every description where battery weight is an issue.

No work has yet been done to create a motor using a Rodin Coil as a building block.

All of the work on Rodin Coils to date has been with 2D coils wrapped on the surface of a torus. Starting with the fact that the numerical patterns of the Rodin Torus has resulted in more efficient 2D coils, one can easily surmise that a layered torus wrapped in 3D would achieve an even much higher efficiency. No work has yet been done on 3D toroidal coils.

### Antennae

Rodin Coil antennae would be useful in any application where sensitivity

to a particular frequency was important, and the form-factor of the Rodin Coil was acceptable. Portable communication devices for use in a wide variety of applications should benefit, since power requirements for boosting the antenna signals should be greatly reduced from standard antenna designs. By varying the points at which the coil is tapped, it may be possible to tune the antenna to a wide range of desired frequencies.

Work has been done in this area already, with significant successes reported.

No work has been done using 3D Rodin Tori for antennae.

### Transformers

It might be possible to arrange multiple Rodin Coils so as to take advantage of the increased magnetic field at the center. This could result in more efficient, lower weight transformers.

Use of Rodin Coil transformers in standard electrical circuits may be difficult, however, since the very presence of the increase in magnetic field might cause a problem with other circuit elements. Significant shielding of Rodin Coil transformers would be required in any application involving multiple circuits, such as a radio receiver.

## **Electromagnets**

There are a variety of applications for large electromagnets. These include mundane applications such as cargo transfer, scrap iron handling, and monorails, as well as the more exotic fields such as particle accelerators, magnetic cannon, and ion beam sources (including ion beam space drives.) Rodin Coil electromagnets would presumably produce a higher magnetic field than an equivalent conventional electromagnet, possibly benefiting these applications if form factor issues can be overcome. New applications may also be possible, since the orientation of the magnetic field is perpendicular to the field of conventional coils.

## **Revolutionary Applications**

Various researchers have seen the Rodin coil as a solution to interesting problems in their diverse areas of expertise. Some of these ideas have little support in conventional scientific thinking. Nonetheless there are interesting possibilities which, should they bear fruit, would unlock new technologies.

The most compelling of these is the notion of a point energy source, or the extraction of energy from a vacuum. To most of us reared on the wisdom of conventional science, this is a fairly outlandish idea. One researcher, however, has presented detailed citations from a variety of physicists who support the notion, and base their support on what at first blush appear to be both established

scientific experimental evidence, and sound theoretical principles.

If this idea were to bear fruit, it would usher in a new age of technology surpassing those brought on by such inventions as the steam engine, the internal combustion engine, and the electric power generator. It would surpass those important inventions because no fuel would be consumed in the creation of energy; instead, ambient energy would be focused on the desired application.

## **Theoretical Issues**

Although considerable effort has been expended on diagramming the numerological patterns in Mr. Rodin's findings, little effort has been made in a number of areas which need further examination before the importance of the findings are fully comprehended.

For example research shows that there are 6 different combinations of series, which produce distinct implementations of Rodin's toroidal pattern in 2 dimensions. Nothing however indicates the physical meaning, if any, of thinking in terms of one series or another.

Additionally it remains unknown how many different ways there are to enumerate these series into 3D tori. Three such combinations have been enumerated, but it is unknown if there are more, and if so, how many. Also, as with 2D tori, it is not known what the physical implications of these various ways of building 3D tori are.

Finally, nothing has yet been accomplished which links Mr. Rodin's patterns to conventional scientific theories. The fact that utilizing this pattern does result in effective coil design is probably not an accident, but there remains an enormous gap between what is considered "known science" and Mr. Rodin's patterns. This remains true in spite of the application of these patterns to such diverse areas as plant growth and musical harmonics. Until a clear link between the Rodin Torus and known scientific theory is established, it may prove difficult to bring the full attention of the conventional scientific community to bear on solving any remaining problems.

These points are raised not to criticize a field in its infancy, but to illustrate the rich arena of study that remains immediately accessible to research. Doubtless any discoveries made in answering these questions will result in new areas of study to explore.

## **Prognosis**

This report, and the supporting documentation on experiments using the Rodin Coil, should be submitted for review by a panel of technical experts from the fields of electric motor, antenna, transformer, and electromagnet design and manufacture. If these industry experts agree in principle with the prospects for Evolutionary Applications, there are sufficient immediate practical applications of the Rodin Coil to warrant the expenditure of funds.

This is so much the case that funding should be considered more a venture capital investment than a charitable donation to a worthy cause, worthy though it may be.

In this case the strategic order of business is clear. First develop the most promising evolutionary applications into marketable products. Use the profits from these products to fund both less accessible evolutionary product development, and also theoretical research and Revolutionary Application development. Should the latter bear fruit, the potential technological impact is, as previously discussed, enormous.

A detailed Business Plan, including the usual *pro forma* financial statements,

should determine the precise level of funding required.

If the industry experts conclude that there are no evolutionary practical applications of the Rodin Coil, due perhaps to issues of manufacturing cost or insurmountable application difficulties, then the effort would perforce become somewhat more speculative. The more Revolutionary Applications of the design would remain to be explored, along with the more theoretical questions posed above. Nonetheless, although the effort might lose some of the self-funding appeal of the venture capital approach, the potential technological impact is still enormous. And that goal may be achieved more rapidly, since the effort would, at the outset, be focused on the

ultimate objective, rather than giving priority to the more immediate concerns surrounding the development of a self-propelled start-up business enterprise.

In either case the effort requires a strong business manager of competent scientific training. The setting of priorities and the proper sequencing of the research efforts, along with the timely and appropriate expansion of research and development staff, require all the skills normally found in a high-tech start-up entrepreneur. This is essential for a proper utilization of funds devoted to the effort, as well as the most rapid development of results.

# Introduction to Rodin Coil Design by Thomas Bearden

©Copyright 1996 by Col. **Thomas Bearden, Associate**

Editor Alternative Energy Research

There exists a valid Electromagnetic mechanism that will produce the *effects* reported in the article to follow and other similar effects as well. It is not magic, but electromagnetics of a special kind.

Simply, the magnetic vector potential A is "defined" by the equation  $B = Vx A$ . If you "choke off" or "kill" the  $Vx$  operator (which is called the "curl" operator), then this leaves the curl-free A-potential to move out on its own, without being tied to a magnetic force field (i.e., to a B-field) as it almost always otherwise is. In other words, one has tom the potential away from its associated force field, and the potential propagates independently in space. However, anything you place in the path of that curl-free A-potential to interact with it, that will once again permit the  $Vx$  operator to occur, will provide you a normal magnetic force field (B-field) again. Since the  $Vx$  usually occurs in, say, something like a coil or wrapping of a conductor, then you get the E-field induced also, by the time rate of change of the A-potential, so that you wind up with a normal EM field containing both E and B fields. The E-field occurs by the interaction of  $E = -aA/t$ . One of the great promises of curl-free A-field utilization is that it propagates into and through media in which normal EM transmission is difficult or impossible, as pointed out in the Gelinias patents.

Obviously if you hold all the B-field inside the coils of the torus, and then put something else in the center region outside the coils, you can get some *additional* potential and field energy there in the center works. You can also get similar propagation outside the coil, with effects on distant objects.

Rodin is apparently going by elementary electricity concepts but augmented by excellent native intuition. What he really is doing is attempting to separate the A-potential (i.e., the magnetic vector potential A) from the B field, and utilize the curl-free A-potential as an independent field of nature in the central "crossover" region. It is known in physics that this is possible ; the well known Aharonov-Bohm effect depends upon precisely this separation. It appears that neither Ramsay nor Rodin are aware that a tightly-wound torus performs this' "curl-free" separation of the A-potential, by trapping the B-field inside the coiled wiring, so that in a very good torus coil most of the B-field can be contained within the *coil*, and the curl-free A-potential will still radiate from the coil (both to its inside or center space and outside and beyond into space.).

A great deal of work on this use of the "curl-free A-field" was done by Gelinias, who patented several patents in this area which were assigned to Honeywell, Inc., the firm for which he worked at the time. Professor William Tiller of Stanford University is also a noted and highly competent advocate of the curl-free A-field. In the late 70s and early 80s, Bill Tiller, Frank Golden and I worked on curl-free A-potential antennas, and Golden built dozens of curl-free A-field coil antenna variants.

One of the most interesting variants he built was quite similar to Ramsay's buildup of the Rodin coil. Simply, he built a coil embodiment of the diagrammatic **geometry for a "twistor" that was shown by Roger Penrose. That coil antenna exhibited about what Ramsay and** Rodin are reporting, and dramatically extended the communication range of a small CB radio from, say, its nominal 114 mile to about 20 miles or more. The A-potential from a dipole antenna falls off about inversely as the *square* of the distance, while the normal B-field falls off about inversely as the *cube* of the distance. There is one other fact that **deepens the curl-free A-potential phenomenon: Any vector field** can be replaced by (mathematically decomposed into) two scalar fields; for the proof, see Whittaker 1904. With some difficulty one can even "assemble" a curl-free A-potential from two multifrequency transmitter arrays that transmit two harmonic series of wavepairs, where each wavepair consists of a normal EM wave and its true phase conjugate (for the proof, see Whittaker 1903). Each of the arrays transmits one of the scalar fields (scalar waves) that together comprise the curl-free A-potential. So the curl-free A-potential is actually a part of the **Stoney/Whittaker scalar electromagnetics I have** so long advocated. At any rate, Rodin and Ramsay should certainly continue their research and experimentation.

Nelson, University of Hawaii, "In my opinion, the Rodin Coil may have more than just unusual or interesting electromagnetic properties. Mr. Rodin's model is a new way to look at the relationship between music, mathematics, and the structure of plants and animals. I believe that a study of the relationship between energy and matter could start by applying the principles of the Rodin Torus model and Rodin's "Vortex Based Mathematics" I was able to arrive at an independent and scientifically valid confirmation of the mathematical principles that form the basis of the Rodin Torus model." Sal Rosenthal, inventor and patent holder of the tuberculosis test, regularly invited Rodin to participate in his California think tank.

Subject: Letter of Recommendation from **B Townsend** / The Rodin Coil

To whom it may concern,

For millennia, humankind has been fascinated by the unique powers numbers possess. Like Plato and his predecessors, the philosophers of Nature were especially interested in the distinctive quality of a number rather than its sole quantitative attributes. Their instinctive curiosity and contemplation on abstract number's role in the phenomenal world delivered to them the secrets Nature had once concealed. New discoveries and applications offered humanity the opportunity to formalize the cornerstones of civilization: agriculture, architecture, art and music, calendrics and celestial navigation, language, law, mathematics and geometry, science, weights and measures, and the capacity to become self-organizing. In the modern world, however, a number is esteemed mainly for its arithmetical capacity rather than its underlying significance. Fortunately, the ancient art and tradition of philosophy has preserved the noble science of numerology: the search for the hidden meaning in numbers. It is to this realm, that Marco Rodin serves as a conduit for the archaic institution of the number theorist.

Mr. Rodin, similar to a present-day Pythagoras, has rediscovered some of the inherent behaviors in numbers, their relationships to the sensory experience in conjunction with living systems, and their possible implications and applications to the challenges of today's growing global culture. His musings in modulo nine and binary mathematics combined with the involuting, evolving, and revolving of the toroidal sphere offers new insights into the organization and characteristics of dynamic systems. The potential scope and breadth of these revelations is universally applicable in science, biology, medicine, genetics, astronomy, chemistry, computer science, and physics. Marko Rodin's ability to recognize the obscured patterns within number is with merit and can assist those inclined to utilize such information regardless of their profession or its particular usage. His subject material is multi-disciplinary, multifaceted, and sure to pique the fancy and imagination of anyone curious enough to peruse Mr. Rodin's material. Consider, for a moment, his intuitively conceived winding of the toroidal shaped "Rodin Coil" that is experimentally verified 60% more efficient than the conventional coil wrap. This is synergy: "the behavior of whole systems unpredicted by the behavior of their parts taken separately." I sincerely urge the reader to examine Mr. Rodin's theories and insights to their discretion and pleasure.

Thank you very much for your consideration.

Byron Townsend
