# ILLUSTRATING IMPLOSION & EXPLOSION

Three and six can never touch and only connect with the number nine. They are the furthest most distance from one another and create the forwards motion of time. Nine is Omni-dimensional Spirit and 3 and 6 are the magnetic fields that give slippage and free-play in the reverse direction. When nine is positive 3 and 6 are both negative and visa versa. Nine is the central axis of control.

# HIGHER DIMENSIONS ARE COMPRESSED

I firmly believe that all the higher dimensions are compressed and combined together into One. I refer to this higher dimension as the Omni-dimension. This Omni-dimension is revealed by the discrete number pattern  $+3 -9 +6; -6 +9 -3; +3 -9 +6$ . Because Spirit and magnetism are inseparable and always occur together at the same time the 4th and 5th dimension are really One. The magnetic field occupies the 4th dimension and the Spirit Flux exist in the 5th dimension. Only magnetism can give slippage and free play to Spirit by moving simultaneously in the opposite direction. Spirit emanating linearly in a straight line is the source for the curvature and warpage of the universe.

Numbers are real and alive. When Spirit pierces the Decoqubit's torus skin a discrete number is created along with curvature. Utilizing Vortex Based Mathematics, I am able to do Spirit Density mapping and observe the longest mean-free pathway for electricity or any other continuous medium. Superfluidity is the result regardless of the material, be it air, water, plasma, or even an entire solar system thereby achieving macroscopic quantum results. The Decoqubit torid number map is the blueprint of the universe.

The number Nine represents the W-Axis of Spirit which penetrates everything, is irresistible, and is known as the Dandelion Lion Puff Principle shown above.

# THE TORUS SKIN MODELS HARMONIC CASCADENCE

## The Dandelion Puff Principle is based upon Super Primes Squared

As Spirit emanates, it reticulates the Decoqubit, creating seamless discrete number multiplication series along the X-Y-Z axis on the 3rd dimension. This

occurs as a result of core tethering. All discrete numbers contain Spirit's (W-axis) metadata from the 5th dimension.

## DIAMONDS ARE MINIATURE MIRRORS AIMED AT THE CENTRAL AXIS INVERSION POINT

Diamond Quantum Tiles are miniature mirror facets aimed at the central axis. There is only one source of light but we see all of the reflections in the mirror panes and think there are a multitude of lights.

The Decoqubit Holographic Hypersphere is a faceted crystal with quantum positioned numbers. The Palindrome 3•9•6 6•9•3 is a higher dimensional Flux-field. Every coil always has an associated Spiritual Flux and magnetic field. These two are inseparable. There are two types of fields. Toroidal fields and Poloidal fields. Conventionally wound motor coils use toroidal fields while fusion reactors use Poloidal fields. The Decoqubit Holographic Hypersphere creates a Poloidal field.

## The Dandelion Puff Growth Principle

The Dandelion Puff Principle is known as a combinatorial explosion, a rapid growth of the complexity.

The Diamond Quantum Tiles crystal lattice reticulation pattern (net like pattern) is a result from Spirit emanating. Professor Scott Nelson refers to discrete numbers as being stationary vector interstices. There is one discrete number per DQT. I have shifted all of the numbers onto the face of the tiles for easier viewing. Every time Spirit pierces the Torus it rarefies the skin and creates a discrete number. The Decoqubit toroid number map defines what a quantum is in perfect terms during ad infinitum exponential growth. Within the Decoqubit holographic hypercomputer both the hardware and the software are one and the same because of the instantaneous time component.

# The Botanical Integer Lattice

A daisy integer matrix has an unusual mathematical property; it serves as a simple and naturally efficient prime number sieve. The data reveal a mutual dependency between prime numbers and Fibonacci numbers, and the natural and central symmetry of prime numbers within three-dimensional objects. Botanical objects literally contain a natural prime number generating algorithm within their structural growth algorithms.

A hypothetical distribution of growth units on the surface of a cone, showing the distribution of the first 6 consecutive plant growth subunits on the surface of a cone (after Conway and Guy, *The Book of Numbers*). Figure (a) shows that the subunits have a specific position on the surface of the cone. Consecutive subunits (e.g., florets) diverge from each other in succession by the same angle in relation to center (b). This growth process produces sets of opposing spirals on the surface of the object and a botanical matrix of integers in space and time (c).

Use a pair of scissors to cut along the dotted lines. Join the left and right ends of the matrix (columns #1 and #34, respectively) to form a cylinder or other shapes, which are possible with a stretchable spreadsheet substance such as rubber.

Note that this algorithm creates a sloping, saw tooth array of numbers. As will be demonstrated, this type of sloping, Fibonacci phyllotaxis matrix is a highly efficient and elegant prime number sieve.

## Matrix Form of Growth Related to the Fibonacci

The multiples of each prime number follow unique spiral paths along her surface of the flower from simple multiplication series associated with Fibonacci differences.

Only 3 and 6 can respond fast enough to the number 9 to give slippage and free play. This illustration of the 3, 6, 9 Family Number Group reveals when and where Spirit and magnetism pierce and rarefy the Torus skin, and is a result of the squaring of prime number 3 which makes a 5-D Omni-dimensional hypersphere. Spirit and magnetism are the driving force behind life and the source of phyllotaxis which is the spiraling growth patterns unfolding within plants, people, and planets.

There are no computer scientists today who understands the palindrome 3•9•6; 6•9•3; 3•9•6 which is the Omni-dimensional computer language that obsoletes the primitive 2D binary code used today by Apple and the PC. Little do they know that the binary code is a periodic 6 digit recursion repeating pattern.

All chessboards contain 64 tiles. The Mobius Circuit starts anew at 64. The Decoqubit Holographic Hypersphere is God's chessboard. The fabric of the universe is elastic and cannot be ripped or torn apart because it is made out of diagonals.

# MOTION, VIBRATION AND TIME

Spirit emanates in thirds...life and propulsion systems mimic nature's design. +3 -9 +6; -6 +9 -3; +3 -9 +6 . . . . the pulse of the in and out, the breath of the Spirit.

Spirit's positive emanations originating from the zero occur along the W-axis and are the source of all motion, vibration and time.

Every multiplication series has a counter directional multiplication series on the same plane that is the opposite polarity and opposite direction.

Spirit is irresistible, penetrates everything, and is the source of all motion, vibration, and time.

## THE EYE OF THE NEEDLE WARP DRIVE

Poloidal Pinch Mirror Symmetry Toroid Coil  
Intergalactic Space Power Propulsion System

Poloidal Pinch at the Primal Point of Unity is where Spirit originates as it travels out in a straight line along the W-axis. At the Primal Point of Unity everything inverts. The vortex renews, cleans and purifies the environment. Compression shock waves ring throughout the Torus hypersphere.

Poloidal Pinch can be used as an intergalactic space power propulsion warp drive. The Flux Thruster Atom Pulser is a nozzle which is steered by the micro underpinning nested vortices, which act as gimbals to control space vehicle navigation.

# Infinity's Epicenter

Only the numbers 2 and 5 connect to the number 1 at the event horizon which makes a portal into another world. This is the Primal Point source of emanation for Spirit that can be utilized as a reaction-less drive intergalactic spaceship. This is a doorway that connects the higher eternal Omni-dimensional world to the contingent third dimension that is dependent on Spirit of its existence.

## TWO COMPLETELY DISTINCT DIFFERENT WORLDS THAT ARE INTERTWINED TOGETHER

The 3•9•6 drives and moves this Mobius Circuit forward. Only when you separate the Mobius Circuit from the associated higher-dimensional Flux-field are you able to see the internal functionings.

## THE MOBIUS CIRCUITS ARE A FLUID PUMP

Mankind incorrectly sees only one counting system and does not realize that the base ten system is composed of two separate realities. The 1-2-4-8-7-5 is an unbroken coil that is a bounded infinity of duration. This is the pathway that superconductivity and superfluidity takes as energy is flowing into the future. All continuous mediums follow this pathway be it air, water, electricity or even a solar system. This is scientifically referred to as the longest mean free pathway, the distance that a molecule travels without collisions, with no resistance.

## THIS APPLIES TO ALL MICROBIOLOGICAL SYSTEMS AS WELL

Two worlds combined into one. The 1-2-4-8-7-5 Mobius Circuit posses horizontal symmetry, while the 3•9•6 is in vertical opposition. This juxtaposition fully reveals how creation was brought into being and is continually being renewed by Spirit's emanations. This is the link between heaven and earth.

These number groupings piece together into a jigsaw-like puzzle pattern that perfectly demonstrates the way energy flows into the future.

HIS ENRAPTURING CALL

The breeze of eternity wafts in this Day  
from the mortal kingdom,  
'Cause a fragrant scent breathes from the  
musk of His enrapturing Call.

The Maids in the glorious chambers go  
into raptures,  
If they hear the melody of His enrapturing  
Call.

New designs are drawn in the world of  
water and clay,  
If from the East the features arise of His  
enrapturing Call.

The earthly world and the holy and  
glorious bowers catch fire,  
If heaven resounds with a sigh of His  
enrapturing Call.

Mortal ears forget what they heard in the  
world,  
If they just enter the circle of His  
enrapturing Call.

Life comes to naught, nothingness takes on  
eternity's hues,  
If the things unseen emerge from the veil  
of His enrapturing Call.

Craving hearts vanish into utter self-  
effacement,  
If they catch one glimpse of the flame of  
His enrapturing Call.

How could have the Messiah crossed the  
heavenly vault,  
Shouldn't He have been guided by the roar  
of His enrapturing Call?

Besides Him, no one could set his foot into  
the world of being,  
So earnest is the watcher of His  
enrapturing Call.

No mortal eye could see any hue of  
existence, O son,  
If, for an instant, the eye would close of His  
enrapturing Call.

O thirsty ones, plunge into the holy, and  
sanctified waters,  
As the fountain is flowing of His  
enrapturing Call.

O Dervish, stop setting the fire of  
meanings to the world:  
His enrapturing Call is entangled with His  
enrapturing Call.
